

EXPOSITION

Victor Frankenstein is found chasing a monster at the North Pole. He meets Captain Walton, who is on a scientific expedition. Victor tells him his life story.

CONFLICT

Victor Frankenstein discovered the secret of bringing things to life. He used body parts from a graveyard and assembled a "creature" who came to life. Upon seeing his creation, he ran in fear, deserting it and became ill. This forced the monster fend for himself.

RIISING ACTION

The monster searched for companionship and love. However, due to his hideous nature, he only found rejection. Bitter and hurt, the monster searched for his creator to get revenge.

CLIMAX

After killing Frankenstein's younger brother, William, the monster forces Frankenstein to make him a bride. When Victor breaks his promise, the monster kills his friend, Clerval, and then Victor's wife, Elizabeth.

FALLING ACTION

Out of revenge, Frankenstein follows the monster north. It is here that he runs into Walton and his expedition. After telling the crew this unbelievable story, he dies.

RESOLUTION

The monster comes in to pay his last respects and tells Walton that he intends on killing himself by setting himself on fire. In the end, Walton turns his expedition back, partially due to the moral of the story: some scientific advancements are not worth the cost.

Frankenstein Anticipation Guide Answers
