S2 How much production a logger gets from a logging job may depend heavily on his skidder operators. They are key men on any logging job. This is one conclusion that forestry engineers at the USDA Forest Service's Forestry Sciences Laboratory at Morgantown, West Virginia, came to after studying the operation of wheeled skidders in mountainous Appalachian terrain. Out of these studies we can suggest ways that new or experienced skidder operators might improve their operating ability and thus increase their production. This information might also be helpful to logging contractors in training their skidder operators for more efficient production.
