synonymous with helping to build a strong and self-reliant India. From a south Gujarat village to the chairmanship of L T Anil Naik's journey has been one of grit, determination, entrepreneurial leadership, 16-hour workdays and a unique management style. What emerges is a visionary leader who ringfenced L T from corporate takeovers by creating an innovative employee welfare foundation and transformed L T into a global technology and engineering powerhouse. Naik also emerges as a devoted family man and a generous philanthropist who has donated most of his personal income to charities through family trusts focused on healthcare, education and community service. Naik's father, Manibhai, a teacher who spent his life serving the rural poor, was his role model who taught him to be fearless and honest with the motto: "If you are in the right, you have nothing to fear." This is the story of a man who surmounted great odds to reach the pinnacle of success, says Merchant. It demonstrates more than anything else that honesty, the quality Naik prizes most, pays the greatest dividend of all: in the end, the respect of your peers, the loyalty of your colleagues and the affection of your family.

However, a consistent microscopic theory of HT superconductivity based on bipolaron mechanism leads to a better understanding of microscopic and macroscopic description. By presenting aspects of superconductivity now joined in a strict theory rather than separate models, this work is especially useful for graduate students. **Congressional Record** United States. First of all, the book is addressed to professional physicists, but in order to achieve maximal concentration and clarity, it uses the simplest high-school mathematics. As a result, many pages of the book will be useful to college students and may appeal to a more general audience. Oregon State System of Higher Education Bulletin

Nagel,Willi Jäger,2007-07-26 The last two years have been great for high performance computing in Baden W urttemberg and beyond In July 2005 the new building for HLRS as well as Stuttgart's new NEC supercomputer which is still leading edge in G many have been inaugurated In these days the SSC Karlsruhe is finalizing the installation of a very large high performance system complex from HP built from hundreds of Intel Itanium processors and more than three thousand AMD Opteron cores Additionally the fast network connection with a bandwidth of 40Gbit/s and thus one of the first installations of this kind in Germany brings the machine rooms of HLRS and SSC Karlsruhe very close together With the investment of more than 60 Million Euro we as the users of such a valuable infrastructure are not only thankful to science managers and

politicians but also to the people running these components as part of their daily business on a 24/7 level
Since about 18 months there are a lot of activities on all scientific advisory and political levels to decide if Germany will install an even larger European supercomputer where the hardware costs alone will be around 200 Million Euro for a five year period
There are many good reasons to invest in such a program because beyond the infrastructure such a scientific research tool will attract the best brains to tackle the problems related to the software and methodology challenges
