Manual of Clinical Phonetics Martin J. Ball, 2021-04-11 This comprehensive collection equips readers with a state of the art description of clinical phonetics and a practical guide on how to employ phonetic techniques in disordered speech analysis Divided into four sections the manual covers the foundations of phonetics sociophonetic variation and its clinical application clinical phonetic transcription and instrumental approaches to the description of disordered speech The book offers in depth analysis of the instrumentation used in articulatory auditory perceptual and acoustic phonetics and provides clear instruction on how to use the equipment for each technique as well as a critical discussion of how these techniques have been used in studies of speech disorders With fascinating topics such as multilingual sources of phonetic variation principles of phonetic transcription speech recognition and synthesis and statistical analysis of phonetic data this is the essential companion for students and professionals of phonetics phonology language acquisition clinical linguistics and communication sciences and disorders

Manual Asymmetries, Handedness and Motor Performance Pamela Bryden, Andrea Helen Mason, Claudia L. R. Gonzalez, 2016-06-10 The performance of most tasks with one hand typically the right is a uniquely human characteristic Not only do people prefer to use one hand rather than the other but also they usually perform tasks faster and more accurately with this hand The study of manual asymmetries and what such performance differences between the two hands reveal about brain organization and motor function has been a topic of considerable research over the last several decades The aim of this Research Topic is to review and further explore the origins of manual asymmetries and their relationship to handedness unimanual and bimanual motor performance and brain function The articles included here involve original research conducted in humans or non human models species as well as theoretical perspectives review articles and meta analyses

The SAGES Manual of Hernia Surgery S. Scott Davis, Jr., Gregory Dakin, Andrew Bates, 2018-11-23 This edition of the SAGES Manual of Hernia Surgery aligns with the current version of the new SAGES University MASTERS Program Hernia Surgery pathway This manual serves as a curriculum for participants in the MASTERS Program as well as a modern text on hernia surgery for all learners Hernia surgery is one of the fastest developing fields in general surgery today There have been rapid advancements in hernia techniques in recent years making most prior texts on the subject obsolete These advancements involve significant evolution in both the techniques and strategies for hernia repairs as well as the tools used to achieve these means This text thoroughly addresses the multiple component separation techniques and options for locations of mesh repairs It also discusses the revolution of hernia repair being facilitated by robotic surgery which allows increased access to minimally invasive techniques for surgeons and thus increased access to minimally invasive surgical repairs for patients This manual will be a valuable resource for interested surgeons to understand the variety of potential approaches to individual hernias and to individually tailor the care of the hernia patient

Mapping Human Sensory-Motor Skills for Manipulation onto the Design and Control of Robots Matteo Bianchi, Gionata

Salvietti,2019-03-25 Humans are endowed with extraordinary sensory motor capabilities that enable a successful interaction with and exploration of the environment as is the case of human manipulation Understanding and modeling these capabilities represents an important topic not only for neuroscience but also for robotics in a mutual inspiration both to inform the design and control of artificial systems and at the same time to increase knowledge on the biological side Within this context synergies i e goal directed actions that constrain multi DOFs of the human body and can be defined at the kinematic muscular neural level have gained increasing attention as a general simplified approach to shape the development of simple and effective artificial devices The execution of such purposeful sensory motor primitives on the biological side leverages on the interplay of the sensory motor control at central and peripheral level and the interaction of the human body with the external world This interaction is particularly important considering the new concept of robotic soft manipulation i e soft adaptable yet robust robotic hands that can deform with the external environment to multiply their grasping and manipulation capabilities Under this regard a preeminent role is reserved to touch being that skin is our primary organ to shape our knowledge of the external world and hence to modify it in interaction with the efferent parts This Research Topic reports results on the mutual inspiration between neuroscience and robotics and on how it is possible to translate neuroscientific findings on human manipulation into engineering guidelines for simplified systems able to take full advantage from the interaction and hence exploitation of environmental constraints for task accomplishment and knowledge acquisition

Lane-Precise Localization with Production Vehicle Sensors and Application to Augmented Reality Navigation Rabe, Johannes,2019-01-10 This work describes an approach to lane precise localization on current digital maps A particle filter fuses data from production vehicle sensors such as GPS radar and camera Performance evaluations on more than 200 km of data show that the proposed algorithm can reliably determine the current lane Furthermore a possible architecture for an intuitive route guidance system based on Augmented Reality is proposed together with a lane change recommendation for unclear situations

The Digital Transformation of Labor Anthony Larsson,Robin Teigland,2019-11-11 Through a series of studies the overarching aim of this book is to investigate if and how the digitalization digital transformation process causes or may cause the autonomy of various labor functions and its impact in creating or stymieing various job opportunities on the labor market This book also seeks to illuminate what actors groups are mostly benefited by the digitalization digital transformation and which actors groups that are put at risk by it This book takes its point of departure from a 2016 OECD report that contends that the impact digitalization has on the future of labor is ambiguous as on the one hand it is suggested that technological change is labor saving but on the other hand it is suggested that digital technologies have not created new jobs on a scale that it replaces old jobs Another 2018 OECD report indicated that digitalization and automation as such does not pose a real risk of destroying any significant number of jobs for the foreseeable future although tasks would by and large change significantly This would affect welfare as most of its revenue stems from taxation and particularly so from the

taxation on labor directly or indirectly For this reason this book will set out to explore how the future technological and societal advancements impact labor conditions The book seeks to provide an innovative enriching and controversial take on how various aspects of the labor market can be and are affected the ongoing digitalization trend in a way that is not covered by extant literature As such this book intends to cater to a wider readership from a general audience and students to specialized professionals and academics wanting to gain a deeper understanding of the possible future developments of the labor market in light of an accelerating digitalization digital transformation of society at large Handbook of Sports Medicine and Science Yves C. Frames of Reference for Pediatric Occupational Therapy Paula Kramer, 2018-12-07 Publisher's Note: Products purchased from 3rd Party sellers are not guaranteed by the Publisher for quality, authenticity, or access to any online entitlements included with the product. **Frames of Reference for Pediatric Occupational Therapy** Fourth Edition uses frames of reference for diagnostic categories: neuro development, social participation, etc., as effective blueprints for applying theory to pediatric OT practice. Updated with new chapters, case examples, and a new focus on evidence-based practice, this proven approach helps students understand the why of each frame of reference before moving on to the how of creating effective treatment programs to help pediatric clients lead richer, fuller lives. The book first covers the foundations of frames of reference for pediatric OT (Section I) and then covers commonly used frames of reference such as motor skill acquisition, biomechanical, and sensory integration (Section II). A final section discusses newer, focused, specific frames of reference like handwriting skills and social participation. A standardized format within each frame of reference chapter covers the same elements: Theoretical Base, Supporting Evidence, the Function/Dysfunction Continuum, Guide to Evaluation, and Application to Practice to help students build the knowledge and skills needed for effective practice.

Human Interaction, Emerging Technologies and Future Systems V Tareq Ahram, Redha Taiar, 2021-09-09 This book reports on research and developments in human technology interaction. A special emphasis is given to human computer interaction and its implementation for a wide range of purposes such as health care, aerospace, telecommunication, and education, among others. The human aspects are analyzed in detail. Timely studies on human-centered design, wearable technologies, social and affective computing, augmented virtual and mixed reality simulation, human rehabilitation, and biomechanics represent the core of the book. Emerging technology applications in business, security, and infrastructure are also critically examined, thus offering a timely, scientifically grounded, but also professionally oriented snapshot of the current state of the field. The book gathers contributions presented at the 5th International Conference on Human Interaction and Emerging Technologies (IHIET 2021, August 27-29, 2021) and the 6th International Conference on Human Interaction and Emerging Technologies Future Systems (IHIET FS 2021, October 28-30, 2021), held virtually from France. It offers a timely survey and a practice-oriented reference guide to researchers and professionals dealing with design, systems engineering, and management of the next generation technology and service systems.

Emotional Engineering, Vol. 7 Shuichi Fukuda, 2019-02-02 This book demonstrates that emotion is a highly influential component in creating a new society and new engineering, revealing the importance of emotion in various aspects of the Connected World. It addresses a wide variety of topics, but with this one underlying aim throughout: Further, it stands out for the approach it takes to the Internet of Things and the Connected Society. The contributing authors illustrate that humans are essentially either playmakers or playing managers, with teamwork and play being crucial aspects of our lives. They argue that strategy is

becoming increasingly important and consider the most adaptable strategy one that will allow us to respond to today's quickly and radically changing situations. The book is particularly focused on the Connected Society as the point of departure and explores what motivates humans, what decisions they should make and what actions they should take. With engineering quickly moving from product development to experience development and the role of emotion in engineering becoming increasingly apparent, this book offers a timely and valuable resource for engineers and researchers alike.

Temporal Sampling and Representation Updating, 2017-11-21
Temporal Sampling and Representation Updating Volume 236 addresses the gap between laboratory studies using static or predictable stimuli and the more complex change that is a characteristic of the real world. Topics in this new volume include a section on Unfolding the time course of emotion perception, Temporal sampling and representation updating for action in interception and grasping tasks, The influence of Cognitive Control and Attention on Temporal Sampling, Lessons from the Attentional Blink, Synchronizing tracking eye movements with the motion of a visual target and Sampling feature distributions with visual search in heterogeneous displays. Contains contributions from experts in diverse fields relating to temporal sampling and representation updating. Addresses the way in which we update our representations of the world when it is more unpredictable. Bridges the gap between laboratory studies using static or predictable stimuli and the more complex change that is a characteristic of the real world as it unfolds over time.

Tillering Behavior of Rice Plant Pravat Kumar Mohapatra, Ramani Kumar Sarkar, Debabrata Panda, Ekamber Kariali, 2025-01-23
This authored volume highlights the concern for food security of Asian nations traditionally focused on rice. Rice grain is a complex carbohydrate used as a primary food energy source. This book focuses on the impact of high rise consumer demand on accelerating grain production and ensuring societal stability. Wide coverage is given to variation in rice cultivation under unstable and sharply differing environments where soil moisture level dictates plant phenology, exaggerating tillering dynamics. The book provides essential information for environment specific regulation of plant growth, tiller number, growth pattern and manipulation of tiller dynamics for yield. Authors have also elucidated molecular biology underlying tiller survival, the origin of rice and factors crucial for evolutionary change of plant type devoted to imaging a designer plant type. The book includes topics on the ecology of rice environment, cultural types, ontogeny of tiller formation, tiller classes, genetic control of tillering and physiology of tiller growth. A comprehensive account of tiller dynamics resilient to climate change helps students and researchers learn and gain skills to achieve optimum rice yield. This book is important to students, teachers, researchers and climate change scientists. Further, it serves in designing and shaping rice production in the disintegrating rice agroecosystem under the impact of climate change.
