

Chapter 9 – Food and Agriculture AP Human Geography – Reading Guide **ANSWERS**

Key Issue 1 – Where Did Agriculture Originate?
Rubenstein 12e, Pgs. 308-311

1. Define agriculture: deliberate modification of earth's surface through cultivation of plants and rearing of animals to obtain sustenance or economic gain
2. Define cultivate: "to care for" usually a crop or a farm animal
3. Define the agricultural revolution: a time when humans first domesticated plants and animals and no longer relied entirely on hunting and gathering
4. When did the agricultural revolution occur? How can scientists be certain about that date?
Around 6000 BC because that's when the world's population began to grow at a more rapid rate - indicating that humans had larger and more stable sources of food and more people survived
5. Explain the factors that contributed to the agricultural revolution:
 - Environmental factors - climate change caused a redistribution of humans, animals and plants as the earth moved out of the ice age
 - Cultural factors - preference for living in a fixed location rather than nomads would have encouraged people to learn how to farm and begin permanent settlements
6. Label the crops and animals that were first domesticated in each of the regions of the map:
