

KENWOOD

"Image Enhancer" technology ushers in a new era of Kenwood speaker development. Based on a patented Kenwood design, the simplicity of the gently curved exterior is not only attractive but also highly functional. All sharp corners are eliminated to prevent adverse sound wave reflection and interference. Even a new grill design is adopted to ensure the full benefit of "Image Enhancer" technology: flatter and wider dispersion of the sound image with noticeable improvement in vocals. Effort has also been made to strengthen bass sound response and achieve higher mid-range efficiency by increasing magnet size. Despite this adoption of thicker magnets, our engineers successfully reduced mounting depth, enabling easy installation in a greater variety of cabin environments. Incorporating superior diaphragm materials that can withstand power output in excess of 1,000 W and featuring innovative enclosures that enhance sound imaging, Kenwood speakers are the perfect match for the power and performance of our advanced car audio systems.
