Expanding Tertiary Education for Well-Paid Jobs Andreas Blom, Reehana Raza, Crispus Kiamba, Himdat Bayusuf, Mariam Adil, 2016-06-02 Expanding Tertiary education with quality relevance and equity is one of the most decisive challenges for Kenya's future including the achievement of the ideals of the 2010 Constitution and especially its 2030 vision which aims at transforming Kenya into a newly industrializing middle income globally competitive and prosperous country That is because tertiary education can contribute in a critical manner to successfully overcome several of the country's challenges This book provides analysis and policy recommendations to Government of Kenya tertiary education leaders and the many stakeholders on managing the massive tertiary education expansion facing the country This book first discusses the motivation for the analysis and its choice of three critical topics quality and relevance governance and student financing Secondly it reviews findings on each area and third it ends with a set of policy recommendations

African Science Granting Councils Teboho Moja, Okunade Samuel, 2024-01-23 This book delves into the research policy nexus as it relates to development in Africa It does so by examining four country cases Botswana Cote d'Ivoire Kenya and Zambia while referring to South Africa as a possible exemplar case The book reaffirms that the majority of governments in Africa spend less than one per cent of their GDP on research and development R D despite the commitment to raise their research funding levels contained in the Lagos Plan of Action 1980 Hence reliance on external funding for research persists on the continent To manage research engagements and public funds Science Granting Councils SGCs have been established These institutions are held accountable for how public funds are spent and how the research they fund contributes to the advancement of society To date the SGCs and researchers have demonstrated in various ways how funded research contributes to the advancement of society However there appear to be differences in opinion amongst key stakeholders in terms of what constitutes research priorities as well as expectations in terms of the returns on research investments made This book brings to the fore the importance of research and its outcome on societal development and

reveals the stake that African governments hold in the process The book encourages African governments to show greater commitment to providing funding for research on the continent This is critical if governments are to assume a lead role in the continent s development agenda It would also set the stage for partnerships with other stakeholders including industry and funding organisations Researchers are also encouraged to work closely with the SGCs to ensure the valorisation of research products for societal benefit This has a potential to unlock more funding for research in Africa which in turn would drive the development of the continent Funding Higher Education in Sub-Saharan Africa D. Teferra,2013-10-08 Virtually all

countries in the world are struggling to provide the necessary resources to Higher Education The challenges are particularly complex for economically poor countries in Africa which have recorded massive expansion in the past decade This book analyzes the state of funding and financing higher education in Sub Saharan Africa **Routledge Handbook of**

Emilia Ilieva,Reuben Matheka,2025-08-04 Thus Until A History of Egerton University is a thorough historical chronological and well researched account of Egerton University from a whites only college when it started in 1939 through to the expansion it has experienced over the years culminating in being a full university More than any other university in Kenya Egerton has a long and colourful history but like all the other universities it has suffered from the political economic and financial challenges of the time especially since the double intake of the 1990s Chapter One provides the required background to the study highlighting agricultural and educational policies and steering away from the Happy Valley hype so characteristic of the period The reader will learn about the Egerton family in Chapter Two and particularly about Lord Egerton himself and the colonial circumstances within which he lived The chapter dispels some of the popularly held myths about him Chapter Three deals with the beginnings of the college and the various structural and curriculum experiments tried out and the kind of enrolment and students it experimented with as an all white establishment The chapter ends with Africans beginning to agitate for change With great attention to detail the later chapters put the university in a broader local and international context thereby increasing its relevance to society A History of Egerton University though heavily footnoted and with a detailed bibliography is written in a simple easy flowing and accessible style **Issues of Governance,**

Security, and Development in Contemporary Africa Mohamed Saliou Camara, Alem Hailu, Sabella O. Abidde, 2023-12-15 Governance security and development are three critical components of a dialectical nexus that is both dominant and determinant for any objective and fruitful quest for the understanding of the trajectory of a country a region or in the case of Africa a continent from a colonial past to a neocolonial and meta colonial present and toward a future of strategic optimal independence and self reliance That colonial past and the ensuing neocolonial and meta colonial present have made these critical components and the dialectical nexus that they form particularly challenging for the African continent For this reason Issues of Governance Security and Development in Contemporary Africa offers an in depth interdisciplinary analysis of the challenges that contemporary Africa faces within these critical areas as well as the resources and prospects that the continent possesses and can leverage to overcome the said challenges Using case studies involving a range of countries across the continent Mohamed Saliou Camara Alem Hailu and Sabella O Abidde argue that Africa needs to decolonize the terms of reference that guide its nation building statecraft and national development agenda in ways that will facilitate the establishment of viable systems of governance and security and the promotion of genuine development *American Universities and Colleges* ,2014-10-08 No detailed description available for American Universities and Colleges
