**Service Providers** Mary Helen Gillespie, 2002-10-23 A strategic guide to mastering service provider relationships Well known business management consultant and Boston Globe columnist Mary Helen Gillespie helps business and IT managers navigate through the confusing technology driven landscape of service providers Offering insight into the points of view for both the service provider and client Gillespie guides readers through available services from Internet access and applications service providers to wireless and networking services and IT management services Readers will find business models overviews of the enabling technologies coverage of economic and management issues and clear descriptions of service offerings within each provider type Most importantly decision makers will be able to choose the right service provider to meet their needs and develop strategic partnerships when outsourcing non core business functions , Who Gets Funds from China's Capital Market? Jiazhao G. Wang, Juan Yang, 2014-01-13 The subject of this book is an analysis of the business models developed or adopted by Chinese small and medium sized enterprises SMEs specifically those that are successfully listed on China's capital market in other words it is a dissection of those Chinese business models that have worked In China there are over 10 million companies that are registered with China's State Industrial and Commercial Administration and over 40 million unregistered businesses Among them only about 1,000 companies became successfully listed on China's capital market and were able to obtain public funds from equity investors This book takes a look at who these lucky ones were and what business models led to their success in a highly competitive Chinese market investigations that will certainly be of interest to both Chinese and international readerships In addition this book provides a nuanced and micro view of the Chinese economy As China's economy increasingly receives attention worldwide the amount of research and publications on China's economy is also growing exponentially However the majority of these studies only focus on the macro level of the Chinese economy and aggregate variables such as GDP growth rate inflation etc while little research has been done at a micro and company level to analyze the Chinese economy Thus this book's focus on the case studies of representative firms may help fill some gaps in the study of business and the economy in China Furthermore this book hopes to dispel certain misconceptions about the nature of the Chinese economy There is currently a stereotypical view about Chinese economy for example that China as the workshop of the world primarily produces low end products with low prices to be sold in other countries by budget retailers like Wal Mart or dollar stores While that is true to some extent it is certainly not the whole
