leaving them to flail in the dark Through detailed examples and hands on activities Nancy shows how to guide your students to become active participants in mathematical explorations who are able to answer the question What did I just figure out Her approach values all students as important contributors and shows how instruction focused on mathematical modeling engages every learner regardless of their prior history of success or failure in math **Spots for MATH - Teacher's Edition - Grade 1** Spots for M.A.T.H.,2012-09 Spots for MATH - Teacher's Edition - Grade 1, Volume 2 Spots for M.A.T.H.,2012-08 The Creative Mathematics Teacher's Book of Lists Peter Appelbaum,2024-09-09 Unexpected lists that propel your teaching into refreshingly new directions From lesson planning and assessment strategies to ideas for changing the world there is something for everybody at every level and age of mathematics entertaining humor deeply serious provocations to push you out of the box and good clean wholesome tips for creative experiments in classroom organization
