DESCRIPTION AND APPLICATIONS

The Electro-Voice Model PL6 is a rugged and reliable dynamic cardioid instrument microphone that provides faithful reproduction of sound regardless of working distance, and yet effectively controls unwanted back-ground noise. Change of tone response with working distance is not a problem with the PL6 because it has the patented EV Variable-DP feature. Plug it in, set the level, and forget it.

Feedback in live entertainment situations is caused by sound being reflected off walls, speaker systems, amps, mixers, etc., back into the microphone. Microphones and speaker systems that exhibit peaked frequency response curves tend to trigger a feedback situation. Feedback problems can be minimized by using microphones and speaker systems that exhibit an overall smooth, peak free frequency response. The Pro-Line family of Electro-Voice microphones have an overall smoothness of frequency response that helps significantly to control feedback problems.

Feedback problems can be further minimized by using close mixing techniques on all microphones used whether they be instrument microphones or vocal microphones. Close mixing techniques help reduce feedback because the microphone is closer to the amplifier is at a maximum in this condition and the amplifier's gain setting can be reduced accordingly. This yields a significant reduction of back-ground and reflected sound to the microphone as compared to the performer's voice giving more sound source contact before feedback.
