**Science Fair Projects for Elementary Schools** Patricia Hachten Wee, 1998-11-05 Science Fair Projects for Elementary Schools offers step by step instructions for a hands on learning experience for children in grades 2-5 who are doing science fair projects. Curiosity Bug, a friendly companion, guides the student through every step of a science fair project: finding and researching a topic, developing a controlled experiment, making graphs, and designing a display. Curiosity Bug's sample project provides the child with a detailed example, and worksheets allow the child to work comfortably with his or her own data. Subsequent chapters include two sample projects in each field of science: animals and insects, plants, chemistry, the environment, and microscopes. These are perfect starter projects presented in cookbook style with complete instructions and resources. The child can choose one, follow the procedures given, and plug in his or her data and results. Science Fair Projects for Elementary Schools also provides examples of graphs, ideas for display, and opportunities for further research. Each chapter also includes ten other project ideas and a list of related children's books. A final section provides parents, teachers, and librarians with sample letters, forms, and layouts to facilitate setting up a science fair. This book is sure to spark any student's interest in the intriguing, absorbing world of science. *Science Fair Projects, Grade 1-3* Daryl Vriesenga, 1992 If you plan to have your class do science projects this year for science fair or any other purpose, this book is for you. Science Fair Projects is a practical, simple guide for developing science projects. It will direct your students through each step.

**CliffsNotes Parent's Crash Course: Elementary School Science Fair Projects** Faith Brynie, 2007-05-03 When the science project is due, this book comes to the rescue. With the trend toward hands-on learning, millions of elementary students have to do science projects. Typically, they mention this to their parents the night before the project is due. This book helps busy parents help their children create last-minute science projects using materials commonly found around the house. It features chapter breakouts grouped by science project subject; two-page spreads devoted to specific science projects and factoids to get kids interested in the subject. Parents can quickly pick an appropriate project and spur their future scientists toward success. Faith Hickman Brynie, Bigfork, MT, is a writer specializing in science and health; she holds a PhD in science education, curriculum, and instruction and is a frequent writer for the children's science magazine *Odyssey*, as well as the editor of various elementary school science textbooks. **A Guide to Teaching Elementary Science** Yvette F.
