Approaches to Plant Evolutionary Ecology G.P. Cheplick, 2015-07-01 Plant evolutionary ecology is a rapidly growing discipline which emphasizes that populations adapt and evolve not in isolation but in relation to other species and abiotic environmental features such as climate Although it departs from traditional evolutionary and ecological fields of study the field is connected to branches of ecology genetics botany conservation and to a number of other fields of applied science primarily through shared concepts and techniques However most books regarding evolutionary ecology focus on animals creating a substantial need for scholarly literature with an emphasis on plants *Approaches to Plant Evolutionary Ecology* is the first book to specifically explore the evolutionary characteristics of plants filling the aforementioned gap in the literature on evolutionary ecology Renowned plant ecologist Gregory P Cheplick summarizes and synthesizes much of the primary literature regarding evolutionary ecology providing a historical context for the study of plant populations from an evolutionary perspective The book also provides summaries of both traditional common gardens reciprocal transplants and modern molecular genetic approaches used to address questions about plant adaptation to a diverse group of abiotic and biotic factors Cheplick provides a rigorously written introduction to the rapidly growing field of plant evolutionary ecology that will appeal to undergraduate and graduate students with an interest in ecology and evolution as well as educators who are teaching courses on related topics

Introduction to Computational Science Angela B. Shiflet, George W. Shiflet, 2014-03-30 The essential introduction to computational science now fully updated and expanded Computational science is an exciting new field at the intersection of the sciences computer science and mathematics because much scientific investigation now involves computing as well as theory and experiment This textbook provides students with a versatile and accessible introduction to the subject It assumes only a background in high school algebra enables instructors to follow tailored pathways through the material and is the only textbook of its kind designed specifically for an introductory course in the computational science and engineering curriculum While the text itself is generic an accompanying website offers

tutorials and files in a variety of software packages This fully updated and expanded edition features two new chapters on agent based simulations and modeling with matrices ten new project modules and an additional module on diffusion Besides increased treatment of high performance computing and its applications the book also includes additional quick review questions with answers exercises and individual and team projects The only introductory textbook of its kind now fully updated and expanded Features two new chapters on agent based simulations and modeling with matrices Increased coverage of high performance computing and its applications Includes additional modules review questions exercises and projects An online instructor s manual with exercise answers selected project solutions and a test bank and solutions available only to professors An online illustration package is available to professors **Autecology** Gimme H. Walter,Rob Hengeveld,2014-04-24 This book spells out the theoretical structure methodology and philosophy of the science of autecology

The autecological approach focuses on the interactions of individual organisms and their species specific adaptations with the spatio temporal dynamics of their environment as a basis for interpreting patterns of diversity and abundance in nat

Agroecology Stephen R. Gliessman,V. Ernesto Méndez,Victor M. Izzo,Eric W. Engles,2022-09-30 Agroecology is at the forefront of transforming our food systems This bestselling textbook provides the essential foundation for understanding this transformation in all its components agricultural ecological economic social cultural and political It presents a case for food system change explains the principles and practices underlying the ecological approach to food production and lays out a vision for a food system based on equity and greater compatibility with the planet s life support systems New to the fourth edition A chapter on Alternatives to Industrial Agriculture covering the similarities and distinctions among different approaches to sustainable agriculture A chapter on Ecological Pest Weed and Disease Management A chapter on Urban and Peri urban Agriculture A chapter on Agriculture and the Climate Crisis A revised analysis and critique of the food system s embeddedness in the extractive capitalist world economy that reflects ideas in the emerging field of political agroecology Streamlined treatment of agroecology s foundations in ecological science making the text more compatible with typical course curricula A Companion Website at <https://routledgetextbooks.com/textbooks/9781032187105> incorporates the entire contents of the updated practical manual Field and Laboratory Investigations in Agroecology split into student and lecturer resources These 24 sample investigations facilitate hands on learning that involves close observation creative interpretation and constant questioning of findings Groundbreaking in its first edition and established as the definitive text in its second and third the fourth edition of Agroecology captures recent developments in the field and forcefully applies the idea that agroecology is a science a movement and a practice Written by a team of experts this book will encourage students and practitioners to consider the critical importance of transitioning to a new paradigm for food and agriculture Oak Seed Dispersal Michael A. Steele,2021-01-05 The definitive examination of oak forest evolutionary ecology Seed dispersal is a critical stage in the life cycle of most flowering plants The process can have far reaching effects on a species biology

especially numerous aspects of its ecology and evolution This is particularly the case for the oaks in which the dispersal of the acorn is tied to numerous tree characteristics as well as the behavior and ecology of the animals that feed on and move these seeds to their final destination Forest structure composition and genetics often follow directly from the dispersal process while also influencing it in turn In *Oak Seed Dispersal* Michael A Steele draws on three decades of field research across the globe e g the United States Mexico Central America Europe and China to describe the interactions between oaks and their seed consumers Rodents birds and insects he writes collectively influence the survival movement and germination of acorns as well as the establishment of seedlings often indicating a coevolutionary bond between oaks and their seed consumers This bond can only be understood by unraveling the complex interactions that occur in the context of factors such as partial seed consumption due to acorn chemistry scatterhoarding predation of the seed consumers by other organisms and the limiting effects of masting on insect rodent and jay damage Offering new insights on how animal mediated dispersal drives ecological and evolutionary processes in forest ecosystems *Oak Seed Dispersal* also includes an overview of threatened oak forests across the globe and explains how a lack of acorn dispersal contributes to many important conservation challenges Highly illustrated the book includes photographs of key dispersal organisms and tactics as well as a foreword by Stephen B Vander Wall a leading authority on food hoarding and animal mediated seed dispersal and beautiful artwork by Tad C Theimer also an accomplished ecologist

Atmospheric Perspectives Vlado Spiridonov, **Landscape Planning with Ecosystem Services** Christina von Haaren, Andrew A. Lovett, Christian Albert, 2019-06-25 Human well being depends in many ways on maintaining the stock of natural resources which deliver the services from which human s benefit However these resources and flows of services are increasingly threatened by unsustainable and competing land uses Particular threats exist to those public goods whose values are not well represented in markets or whose deterioration will only affect future generations As market forces alone are not sufficient effective means for local and regional planning are needed in order to safeguard scarce natural resources coordinate land uses and create sustainable landscape structures This book argues that a solution to such challenges in Europe can be found by merging the landscape planning tradition with ecosystem services concepts Landscape planning has strengths in recognition of public benefits and implementation mechanisms while the ecosystem services approach makes the connection between the status of natural assets and human well being more explicit It can also provide an economic perspective focused on individual preferences and benefits which helps validate the acceptability of environmental planning goals Thus linking landscape planning and ecosystem services provides a two way benefit creating a usable science to meet the needs of local and regional decision making The book is structured around the Driving forces Pressures States Impacts Responses framework providing an introduction to relevant concepts methodologies and techniques It presents a new ecosystem services informed approach to landscape planning that constitutes both a framework and toolbox for students and practitioners to address the environmental and landscape

challenges of 21st century Europe **Contesting Global Environmental Knowledge, Norms and Governance** M. J. Peterson, 2019-01-08 Through theoretical discussions and case studies this volume explores how processes of contestation about knowledge norms and governance processes shape efforts to promote sustainability through international environmental governance The epistemic communities literature of the 1990s highlighted the importance of expert consensus on scientific knowledge for problem definition and solution specification in international environmental agreements This book addresses a gap in this literature insufficient attention to the multiple forms of contestation that also inform international environmental governance These forms include within discipline contestation that helps forge expert consensus inter disciplinary contestation regarding the types of expert knowledge needed for effective response to environmental problems normative and practical arguments about the proper roles of experts and laypersons and contestation over how to combine globally developed norms and scientific knowledge with locally prevalent norms and traditional knowledge in ways ensuring effective implementation of environmental policies This collection advances understanding of the conditions under which contestation facilitates or hinders the development of effective global environmental governance The contributors examine how attempts to incorporate more than one stream of expert knowledge and to include lay knowledge alongside it have played out in efforts to create and maintain multilateral agreements relating to environmental concerns It will interest scholars and graduate students of political science global governance international environmental politics and global policy making Policy analysts should also find it useful **Ecological Stylistics** Daniela Francesca Viridis, 2022-09-07 This book reflects the cutting edge in ecostylistic approaches to nature the environment and sustainability as represented in contemporary non literary discourse Firstly the book presents the ecolinguistic and stylistic terms and theories applied in this ecostylistic analysis ecosophy beneficial ambivalent and destructive discourses and foregrounding point of view metaphor and reviews the most recent literature in the field of ecostylistics Secondly the book examines the occurrences of five marker words nature environment ecosystem ecology sustainability on the websites of five environmental organisations and agencies Forestry England Greenpeace International National Park Service Navdanya International World Wide Fund for Nature The main research purpose of this study is to identify beneficial discourses in the environet and to investigate the beneficial ecostylistic strategies utilised to produce them Above all this book reminds us humans that we do not stand apart from nature we are a part of it The book will be of interest to scholars of stylistics ecolinguistics and ecocriticism as well as scholars of discourse analysis environmental communication and environmental humanities *Package Price Agroecology* Stephen R. Gliessman, 2021-02-25 Stephen Gliessman s complementary volumes Agroecology The Ecology of Sustainable Food Systems Third Edition and Field and Laboratory Investigations in Agroecology Third Edition are now available together for one low price Completely revised updated and reworked the third edition of Agroecology presents new data material case studies and options as well as more emphasis on topics such as the values

Building Entrepreneurial Ecosystems in Sub-Saharan Africa Constant D. Beugré, 2016-12-13 Africa suffers from two main diseases poor management and a lack of vibrant entrepreneurial activity The continent has the raw materials the people and the potential to be developed and yet there remain barriers that prevent it from bettering itself To promote entrepreneurship as an engine of economic development and growth the author has developed a Quintuple Helix Model which advocates mutual cooperation and information sharing among the five helices and provides valuable guidelines to policymakers on how to build entrepreneurship ecosystems in sub Saharan Africa It goes on to examine the roles that government donors and public and private sectors play and how Africans themselves might take the development of entrepreneurial societies into their own hands The book includes seven chapters that emphasize the key role that each of the five components could play in the development of entrepreneurial ecosystems Entrepreneurship scholars policy makers and national and local governments of sub Saharan Africa will value this insight as they strive to create a more favorable landscape for their citizenry

Mourning Nature Ashlee Cunsolo, Karen Landman, 2017-05-17 We are facing unprecedented environmental challenges including global climate change large scale industrial development rapidly increasing species extinction ocean acidification and deforestation challenges that require new vocabularies and new ways to express grief and sorrow over the disappearance degradation and loss of nature Seeking to redress the silence around ecologically based anxiety in academic and public domains and to extend the concepts of sadness anger and loss *Mourning Nature* creates a lexicon for the recognition and expression of emotions related to environmental degradation Exploring the ways in which grief is experienced in numerous contexts this groundbreaking collection draws on classical philosophical artistic and poetic elements to explain environmental melancholia Understanding that it is not just how we mourn but what we mourn that defines us the authors introduce new perspectives on conservation sustainability and our relationships with nature An ecological elegy for a time of climatic and environmental upheaval *Mourning Nature* challenges readers to turn devastating events into an opportunity for positive change Contributors include Glenn Albrecht Murdoch University retired Jessica Marion Barr Trent University Sebastian Braun University of North Dakota Ashlee Cunsolo Labrador Institute of Memorial University Amanda Di Battista York University Franklin Ginn University of Edinburgh Bernie Krause soundscape ecologist author and independent scholar Lisa Kretz University of Evansville Karen Landman University of Guelph Patrick Lane Poet Andrew Mark independent scholar Nancy Menning Ithaca College John Charles Ryan University of New England Catriona Sandilands York University and Helen Whale independent scholar

innovation ecosystem An overview of Japanese management is provided from publications in English to the insiders view of Japanese scholars combining these sources with interviews and dynamic groups with local managers and case studies to illustrate the state and evolution of Japanese management and practices Highlighting the people centricity in Japanese management its networked innovative capability sustains enterprise development in a highly dynamic VUCA context The interconnectedness and mutual influence of Japanese and Western management have the potential to generate more general management advancements This Element aims to contribute to the debate on generalization and contextualization culture and metaculture and the coexistence of convergence and divergence Japanese womenomics and its implications for Asian emerging economic powers are also discussed **Forensic Plant Science** Jane H Bock,David O. Norris,2015-11-17

Forensic botany is the application of plant science to the resolution of legal questions A plant s anatomy and its ecological requirements are in some cases species specific and require taxonomic verification correct interpretation of botanical evidence can give vital information about a crime scene or a suspect or victim The use of botanical evidence in legal investigations in North America is relatively recent The first botanical testimony to be heard in a North American court concerned the kidnapping and murder of Charles Lindbergh s baby boy and the conviction of Bruno Hauptmann in 1935 Today forensic botany encompasses numerous subdisciplines of plant science such as plant anatomy taxonomy ecology palynology and diatomology and interfaces with other disciplines e g molecular biology limnology and oceanography Forensic Plant Science presents chapters on plant science evidence plant anatomy plant taxonomic evidence plant ecology case studies for all of the above as well as the educational pathways for the future of forensic plant science Provides techniques collection methods and analysis of digested plant materials Shows how to identify plants of use for crime scene and associated evidence in criminal cases The book s companion website <http://booksite.elsevier.com/9780128014752> will host a microscopic atlas of common food plants *Frontiers in Ecology and Evolution 2020 Highlights* Mark A. Elgar,2021-02-26 If nothing else 2020 reminded us that whether we like it or not human society forms part of a broader ecological community that includes species with management challenges My experience in Melbourne highlighted how environmental threats to humanity are best managed when governments adopt evidence based strategies that might also require incentives for human cooperation Fundamental research ranging from quantitative natural history to broader insights about ecological and evolutionary processes invariably forms the backbone of such evidence The collection of papers in this 2020 Highlights eBook represents a sample of articles in *Frontiers in Ecology and Evolution* that contribute to our collective wisdom in the discipline and generated sizeable interest among our readers We hope you also find them interesting **Encyclopedia of Sustainable Management** Samuel Idowu,René Schmidpeter,Nicholas Capaldi,Liangrong Zu,Mara Del Baldo,Rute Abreu,2023-11-21 This encyclopedia is the most comprehensive and up to date source of reference for sustainability in business and management It covers both traditional and emerging concepts and terms and is fully international in its scope

More than 700 contributions of internationally renowned experts provide a definitive access to the knowledge in the area of sustainable and responsible management All actors in the field will find reliable and up to date definitions and explanations of the key terms and concepts of management in this reference work The Encyclopedia of Sustainable Management represents all aspects of management and business conduct It takes sustainability as a management concept that gives due credit to the complexity and diverging constraints in which businesses and corporations act today and it emphasizes and focuses approaches that help ensure that today s management decisions and actions will be the basis for tomorrow s prosperity

Invasion of Woody Legumes O.W. Van Auken,J.K. Bush,2013-05-22 Includes our current knowledge of the invasion or encroachment and cause of population growth and spread of some dry land arid zone woody legumes Community structure population growth and competition of these woody legumes will also be examined These species and ecosystems are both extensive and dynamic They occur worldwide but mainly in the arid zones of the tropics and sub tropics The cause of the growth and spread of these species and communities has long been claimed to be caused by distal factors rather than proximal ones However these species appear to be influenced and perhaps controlled by anthropogenic factors specifically grazing and fire or lack of fire Their overall worldwide distribution has probably changed little in the recent past but their populations have expanded into grasslands and their density has increased in many places Some associated communities have shown dramatic changes in response to recent large scale droughts and the loss of most of the dominant overstory species However changes in the woody legume communities and their species are generally unknown
