Mathematical Teaching and Learning Katherine M. Robinson, Donna Kotsopoulos, Adam K. Dubé, 2023-06-15 This book focusses on teaching and learning in elementary and middle school mathematics and suggests practices for teachers to help children be successful mathematical thinkers Contributions from diverse theoretical and disciplinary perspectives are explored Topics include the roles of technology language and classroom discussion in mathematics learning the use of creativity visuals and teachers physical gestures to enhance problem solving inclusive educational activities to promote children s mathematics understanding how learning in the home can enhance children s mathematical skills the application of mathematics learning theories in designing effective teaching tools and a discussion of how students teachers teacher educators and school boards differentially approach elementary and middle school mathematics This book and its companion Mathematical Cognition and Understanding take an interdisciplinary perspective to mathematical learning and development in the elementary and middle school years The authors and perspectives in this book draw from education neuroscience developmental psychology and cognitive psychology The book will be relevant to scholars educators in the field of mathematics education and also those in childhood development and cognition Each chapter also includes practical tips and implications for parents as well as for educators and researchers Children, Schools, And Inequality Doris R

Entwisle, 2018-03-05 Educational sociologists have paid relatively little attention to children in middle childhood ages 6 to 12 whereas developmental psychologists have emphasized factors internal to the child much more than the social contexts in explaining children s development Children Schools and Inequality redresses that imbalance It examines elementary school outcomes e g test scores grades retention rates in light of the socioeconomic variation in schools and neighborhoods the organizational patterns across elementary schools and the ways in which family structure intersects with children s school performance Adding data from the Baltimore Beginning School Study to information culled from the fields of sociology child development and education this book suggests why the gap between the school achievement of poor children and those who are better off has been so difficult to close Doris Entwistle Karl Alexander and Linda Olson show why the first grade transition how children negotiate entry into full time schooling is a crucial period They also show that events over that time have repercussions that echo throughout children s entire school careers Currently the only study of this life transition to cover a comprehensive sample and to suggest straightforward remedies for urban schools Children Schools and Inequality can inform educators practitioners and policymakers as well as researchers in the sociology of education and child development

Handbook of Research on Schools, Schooling and Human Development Judith L. Meece, Jacquelynne S. Eccles, 2010-06-10 Children spend more time in school than in any social institution outside the home And schools probably exert more influence on children s development and life chances than any environment beyond the home and neighbourhood The purpose of this book is to document some important ways schools influence children s development and to describe various models and

methods for studying schooling effects Key features include Comprehensive Coverage this is the first book to provide a comprehensive review of what is known about schools as a context for human development Topical coverage ranges from theoretical foundations to investigative methodologies and from classroom level influences such as teacher student relations to broader influences such as school organization and educational policies Cross Disciplinary this volume brings together the divergent perspectives methods and findings of scholars from a variety of disciplines among them educational psychology developmental psychology school psychology social psychology psychiatry sociology and educational policy Chapter Structure to ensure continuity chapter authors describe 1 how schooling influences are conceptualized 2 identify their theoretical and methodological approaches 3 discuss the strengths and weaknesses of existing research and 4 highlight implications for future research practice and policy Methodologies chapters included in the text feature various methodologies including longitudinal studies hierarchical linear models experimental and quasi experimental designs and mixed methods

Curriculum-based Assessment Carroll J. Jones,2008 Although curriculum based assessment CBA has been on the horizon for a number of years there has been a need for a practical classroom based approach for its implementation This second edition is a major revision and update that offers practical and specific methods for developing and using CBAs in an educational setting It gives educators a highly specific step by step approach to building CBAs in the area of reading word recognition reading comprehension content reading mathematics and written expression Each chapter offers detailed easy to read and easy to follow instructions for the assessment construction process To further clarify the process extensive examples are given in table format A unique feature of the text is the manner in which the author illustrates the principles of CBA by providing a case study on one student which is referred to in each chapter Its formative assessment approach gives the teacher additional detailed information about students OCO performance which in turn should guide the type of instruction designed and implemented ultimately leading to higher performance on summative outcome measures Additionally detailed information is provided on subject area CBA construction the creation and implementation of a district wide CBA system for response to intervention and how to use IDEA S response to intervention in student evaluation

in intimate human terms Deutscher believes that the introduction of a sociological perspective can provide a positive element to interdisciplinary pursuits This belief as well as his fresh perspectives on both the strengths and limitations inherent in applied sociology offer the field a revitalising lift As such this highly informative thought provoking volume will be of interest to sociologists and policy makers in health education crime welfare and housing Large-Scale Studies in Mathematics Education James A. Middleton, Jinfa Cai, Stephen Hwang, 2015-05-05 In recent years funding agencies like the Institute of Educational Sciences and the National Science Foundation have increasingly emphasized large scale studies with experimental and quasi experimental designs looking for objective truths Educational researchers have recently begun to use large scale studies to understand what really works from developing interventions to validation studies of the intervention and then to efficacy studies and the final scale up for large implementation of an intervention Moreover modeling student learning developmentally taking into account cohort factors issues of socioeconomics local political context and the presence or absence of interventions requires the use of large data sets wherein these variables can be sampled adequately and inferences made Inroads in quantitative methods have been made in the psychometric and sociometric literatures but these methods are not yet common knowledge in the mathematics education community In fact currently there is no volume devoted to discussion of issues related to large scale studies and to report findings from them This volume is unique as it directly discusses methodological issue in large scale studies and reports empirical data from large scale studies

Barker Bausell,2010-11-01 Too Simple to Fail presents a startling dissection of what is wrong with our educational system and a set of simple common sense steps for improving it This simplicity Bausell argues characterizes both the schooling process and the science of education as

witnessed by legions of researchers who have discovered precious little that their grandmothers didn't already know. Yet surprisingly based upon the author's own studies and a review of the past 30 years of educational research these discoveries boil down to a simple but powerful theory. The only way schools can increase learning is to increase the amount of relevant instructional time for all students. Here Bausell demonstrates that classroom instruction is hopelessly obsolete as are our current testing practices both contributing to the widening opportunity gap between socioeconomic and racial groups. But with an understanding of what is wrong with education today comes the revelation that the answer to these deficiencies has been available to us all along in the form of the tutorial model, the most effective instructional paradigm ever developed. Only in recent years has it become feasible to simulate this extremely effective instructional medium as a universal option that in effect would allow schools to provide relevant instruction as a rule and not an exception. If implemented a new world of opportunity and potential will finally be available to children whose learning is so crucial for our future. The new model presented in this book has implications for identifying not only what is wrong with the way we educate our young but also why it is wrong and how the educational process can be made more efficient, effective, and fair.

English Language Proficiency Assessments for Young Learners Mikyung Kim Wolf, Yuko Goto Butler, 2017-05-25 English Language Proficiency Assessments for Young Learners provides both theoretical and empirical information about assessing the English language proficiency of young learners. Using large scale standardized English language proficiency assessments developed for international or U.S. contexts as concrete examples, this volume illustrates rigorous processes of developing and validating assessments with considerations of young learners' unique characteristics. In this volume, young learners are defined as school age children from approximately 5 to 13 years old learning English as a foreign language (EFL) or a second language (ESL). This volume also discusses innovative ways to assess young learners' English language abilities based on empirical studies, with each chapter offering stimulating ideas for future research and development work to improve English language assessment practices with young learners. English Language Proficiency Assessments for Young Learners is a useful resource for students, test developers, educators, and researchers in the area of language testing and assessment.

Summer Learning Geoffrey D. Borman, Matthew Boulay, 2004-04-26 This book brings together up to date research based evidence concerning summer learning and provides descriptions and analyses of a range of summer school programs. The chapters present theory and data that explain both the phenomenon of summer learning loss and the potential for effective summer programs to mitigate loss and increase student achievement. Summer Learning Research: Policies and Programs presents evidence describing variations in summer learning loss and how these learning differences affect equality of educational opportunity and outcomes in the United States. It discusses the development, characteristics, and effects of the most recent wave of summer programs which are designed to play key roles in the recent standards movement and related efforts to end social promotion. It examines the impact of three of the most widespread, replicable summer school programs serving students across the United

States and considers the characteristics and effects of alternative programs and practices that are designed to combat the problem of summer learning loss head on Intended for education researchers practitioners policymakers and graduate students this volume is particularly relevant to those interested in social stratification equity minded policies implications of the current standards movement and high stakes testing and the development of programs and practices for improving education *Individual Development from 3 to 12* Franz E.
