Eco-service Development Siegfried Behrendt,Christine Jasch,Jaap Kortman,Gabriele Hrauda,Ralf Pfitzner,Daniela Velte,2017-09-08 Sustainable development will not be possible without fundamental improvements in resource productivity and energy efficiency the adaptation of material flows into natural cycles as well as a radical change in production and consumption patterns In essence what is required is not only an ecological approach to product design but

also new marketing and consumption patterns for products that can satisfy our needs in a more environmentally sound way. In recent years there has been growing interest in the possibilities of eco services to achieve some of these aims. Ecologically oriented leasing, renting, pooling and sharing, where the emphasis is placed on the sale of a product's use rather than on the product itself, offer great possibilities for innovation and environmental impact reduction. At the same time there are opportunities to create new commercial enterprises, produce added value to production and distribution functions and therefore create jobs. Up until now, however, there has been little research about the state of the art in eco services, how new services can be developed, what the attitudes of consumers are to services rather than products and what the consequences of such a structural adjustment would be for firms. Eco service Development addresses this lack of research first by providing a comprehensive inventory and analysis of current eco services in four European countries: Germany, Austria, the Netherlands and Spain. It then systematically explores the options open to market participants, the potential for environmental impact reduction, potential barriers to eco services such as consumer and producer resistance, and finally with what political and legal instruments ecologically oriented services can best be promoted. The book analyzes eight consumer sectors: washing, cleaning, cooking, entertainment, gardening, do it yourself, mobility and leisure time from the point of view of both supply and demand, and highlights the optimization potential and development perspectives for commercial new use eco service concepts. This book is the most comprehensive analysis yet published of how eco services are being implemented and how they could best be encouraged, and contains valuable lessons for policy makers, interested businesses and all those in the academic community searching for ways to dematerialize the economy. Circular Economy (CE) is considered as one of the important strategies in addressing Sustainable Development Goals. Practicing Circular Economy provides an overview of CE, covering its evolution, describing the key concepts, programs, policies and regulations. It illustrates several business opportunities over a hundred hand-picked case studies that encompass numerous sectors, various scales of operations and geographies. Another unique feature of the book is the activities listed in each chapter to invoke thoughts, frame assignments and generate discussions. Each chapter lists key additional reading materials and takeaways. Aimed at mid and senior level managers, policy makers, investors, entrepreneurs, consultants, researchers, professors and academic students involved in the subject of environmental management and sustainability, this book introduces the evolution of CE to clarify the key concepts and introduce some of the important global programs and initiatives. CE economy with case studies. Gives a global overview of adoption of CE covering countries such as

India Japan Korea China EU North America Australia and several more Includes information on methodologies followed tools and knowledge resources for practicing CE Provides insight to the business models with numerous case studies covering product design manufacturing and services and the role of innovation and financing Presents a comprehensive overview of opportunities in CE in sectors such as textile steel agriculture and food Covers newly emerging paradigms of CE such as regional circular economy circular supply chains and sustainable procurement and impact of the COVID 19 pandemic on CE Practicing Circular Economy is thus an important resource for every circular economy practitioner and especially to those who aspire to make a career in circular economy
