O'Dell, 2016-04-06 Have you ever noticed that we tend to compartmentalize when teaching our children In real life there aren't artificial barriers between subjects For example when you are cooking or baking you have to use the skills of reading logical thinking and measuring just to name a few In driving a car you see and read road signs read maps and count miles It has become quite clear that there is an abundance of math curriculums available that are nothing but monotonous drill sheets dressed up in pretty colors Pretty colors do not make a living book Content story and the ability to show math in real life make a living math book Math Level 1 Teach math lessons through the creative means of a life story Provides a link for the downloadable answer key Has a scope and sequence that contains learning numbers 0 to 100 circles and patterns counting and addition days of the week and telling time This book was written to be used by you and your young student together It is the story of a twin brother and sister Charlie and Charlotte who are visiting their grandparents farm They soon learn that the farm is full of learning opportunities As you read their story your students will be drawn into the adventure along with the twins They will learn about numbers shapes place value adding and subtracting They will also learn about gardening baby animals on the farm nature and the love of family They will hear exciting stories from Grandpa and Grandma and they will be invited to join the twins on their living math adventures We hope you have a grand time on this adventure **LeapFrog®**
