$$v_e = \sqrt{\frac{2GM}{r}}$$

$$= \sqrt{\frac{2(6.67 \times 10^{-11})(5.97 \times 10^{24})}{6\,378\,000}}$$

$$= \sqrt{\frac{2 \times 6.67 \times 5.97 \times 10^{24-11}}{6\,378\,000}}$$

$$= \sqrt{\frac{79.72 \times 10^3}{6\,378\,000}}$$

$$= \sqrt{124\,992\,160}$$

$$= 11\,180 \text{ m/s or } 11.2 \text{ km/s}$$

**Weaponisation of Space: An Inevitable Reality and Plausible Fallout** Group Captain PA Patil, 2017-01-15 Militarily use of spacebased assets when integrated with operations assumes importance as one of the many force multipliers As on date outer space is being extensively used by the armed forces for varied services which include navigation intelligence surveillance reconnaissance environmental monitoring and advance warning The command and control in today's netcentric environment also depends on space resources Thus the use of outer space with spacebased assets in support of military operations leads to the deduction that space as a medium stands militarised Of late many of the dominant nations have developed or are expanding capabilities to attack the spacebased assets of potential adversaries to disrupt command and control structures Countries like the US and China are contesting for space supremacy and working towards developing spacebased weapons capable of being delivered from spacebased platforms These developments in turn are infusing a sense of insecurity amongst other international players including India and have raised concerns worldwide Development of spacebased weapons by any state has the potential to ignite a new arms race in space as many countries now possess the wherewithal for launching spacebased assets capable of carrying the required payloads Thus from the present capability of militarisation of space we seem to be graduating towards weaponisation of space As outer space has been designated as one of the global commons any sort of deployment or employment of space weapons raises concerns and any use of spacebased weapons will have unpleasant cascading effects In the absence of any international curb or law on space weaponisation it continues to be a conceptual possibility as well as an empirical reality Handsomely Done Daniel Hoffman-Schwartz, 2019-04-15 Handsomely Done Aesthetics Politics and Media after Melville brings together leading and emerging scholars from comparative literature critical theory and media studies to examine Melville's works in light of their ongoing afterlife and seemingly permanent contemporaneity The volume explores the curious fact that the works of this most linguistically complex and seemingly most untranslatable of authors have yielded such compelling translations and adaptations as well as the related tendency of Melville's writing to flash into relevance at every new historical political conjuncture The volume thus engages not only Melville reception across media Jorge Luis Borges John Huston Jean Luc Godard Led Zeppelin Claire Denis but also the Melvillean resonances and echoes of various political events and movements such as the Attica uprising the Red Army Faction Occupy Wall Street and Black Lives Matter This consideration of Melville's afterlife opens onto theorizations of intermediality untranslatability and material intensity even as it also continually faces the most concrete and pressing questions of history and politics Indian Coast Guard Navik DB, GD, and Yantrik Section-I Recruitment Exam Book (English Edition) - Complete Book For Navik Domestic Branch - 25 Practice Tests EduGorilla Prep Experts, Best Selling Book in English Edition for Indian Coast Guard Navik GD DB Yantrik Section I Exam with objective type questions as per the latest syllabus given by the Indian Coast Guard Compare your performance with other students using

*Oxidative Stress to Cognitive Decline - Towards Novel Therapeutic Approaches* Touqeer Ahmed,Nady Braidy,2023-09-01 Oxidative stress plays multiple roles in the pathobiology of several neurodegenerative disorders and Alzheimer s disease in particular Increased oxidative stress in the brain is suggested to be associated with aging greater amounts of easily oxidizable unsaturated fatty acids higher utilization of oxygen by the brain mitochondrial derived free radicals calcium homeostasis and glutamate induced excitotoxicity Moreover environmental chemicals toxins heavy metals and an imbalanced diet might increase oxidative stress potentially leading to a decrease in cognitive functions Cellular health is also dependent on the levels of nicotinamide adenine dinucleotide NAD It has been well documented that NAD is an important coenzyme for over 400 different oxidoreductases and turns out to be a relevant factor to the oxidative stress in the brain Since the last two decades NAD has been shown to be more than a mere regulator of metabolism but rather may play a key role in the aging process NAD along with sirtuins are important for various neurophysiological functions and depletion of NAD may be associated with compromised physiological and cognitive functions To protect the brain from oxidative stress a modest endogenous protective system works in the brain through dedicated enzymatic machinery Key enzymes are superoxide dismutase and catalase which provide protection against oxidative stress Aging various neurological disorders and chronic inflammation might also affect the levels of these protective enzymes and reduce their levels Natural compounds including polyphenols can offer protection through NAD and various other mechanisms Based on these factors it is becoming more and more clear that oxidative stress and its devastating effects on cognitive decline represents a major health issue in neurobiology There is a need to identify potential compounds and therapeutic targets for mitigating oxidative stress and or to strengthen the protective endogenous mechanisms Novel approaches aiming to support and provide protective mechanisms in the brain will represent a great success in therapeutics We welcome all article types focusing on the analysis and investigation of oxidative stress originated from different sources and its impairing effects on the brain We will also accept studies investigating naturally occurring compounds standard medications and nutraceuticals that have an impact on

oxidative stress NAD metabolism and medical and health applications For this the aim of this Research Topic is to provide novel insights on oxidative stress induced by any mechanism impact on brain health and on the strengthening of brain protective mechanisms supporting cognitive functions
