Fighting Market Failure Maria Cristina Marcuzzo,2012-03-12 This collection brings together fifteen essays published between 1994 and 2008 which all look into the contribution of a remarkable group of economists known as the Cambridge school or the Cambridge Keynesians The people involved are better defined as a group rather than a school to denote not adherence to a common body of doctrine but rather the idea of both cohesion and sharing This collection focuses on Keynes Kahn J Robinson and Sraffa who all shared in the physical space and lifestyle of the University of Cambridge The bond between them was intellectual partnership a recognised common ground dialogue and acceptance of criticism Some of the essays in this collection address the content as well as the method and style of the type of economics associated with the Cambridge tradition at the very core of which those economists stand The first section opens with a chapter presenting the group within the physical and metaphorical place which was Cambridge and the remaining five chapters centre on the life and work of each economist The second section has papers looking at them in pairs as it were and revolves around the theme of their collaboration in various intellectual achievements In particular the opening piece makes the rather bold point that the road to the General Theory was not a solitary path In other two papers much is said of Sraffa s intellectual isolation in Cambridge and the difficulty of communication with Joan Robinson The chapters in the third section take up aspects of their theories and approaches which justify the importance and relevance of the Cambridge tradition in economics This book should be of interest to students and researchers within the history of economics and economic thought particularly those focussing on the Cambridge or Keynesian traditions Austrian Economics in Transition H. Hagemann,T. Nishizawa,Y. Ikeda,2010-05-28 This book analyzes both the consistent and changing elements in the Austrian School of Economics since its foundation in the late 19th Century up to the recent offspring of this School It investigates the dynamic metamorphosis of the school mainly with reference to its contact with representatives of history of economic thought Critical Economic Methodology Lawrence Boland,2005-08-18 Lawrence Boland takes issue with both economic methodologists and practicing economists He argues that there has been too much methodology for methodology s sake and that mainstream economics might benefit by using methodology to take a critical look at economic theory The School ,1938 **You Can Do It!**

Harry G. Turner, 1997 Facing the constant threats of corporate downsizing and restructuring many people are finding that midway through their careers they need to go back to school to sharpen job skills and get new knowledge Without condescension this book helps these individuals review the learning tools they need to most effectively absorb new information *Heinemann Economics for OCR* Susan Grant, Chris Vidler, 2003 This text offers clear examples key ideas and activities to ensure full access to the economics specification It also includes exam hints contributed by an examiner from the relevant board **The Examination Statutes, Rev. to June, 17** Oxford University, 1908
