The Culture of Property LeeAnn Lands,2011-08-15 This history of the idea of neighborhood in a major American city
examines the transition of Atlanta Georgia from a place little concerned with residential segregation tasteful surroundings
and property control to one marked by extreme concentrations of poverty and racial and class exclusion Using Atlanta as a
lens to view the wider nation LeeAnn Lands shows how assumptions about race and class have coalesced with attitudes
toward residential landscape aesthetics and home ownership to shape public policies that promote and protect white
privilege Lands studies the diffusion of property ideologies on two separate but related levels within academic professional
and bureaucratic circles and within circles comprising civic elites and rank and file residents By the 1920s following the
establishment of park neighborhoods such as Druid Hills and Ansley Park white home owners approached housing and
neighborhoods with a particular collection of desires and sensibilities architectural and landscape continuity a narrow range
of housing values orderliness and separation from undesirable land uses and undesirable people By the 1950s these desires
and sensibilities had been codified in federal state and local standards practices and laws Today Lands argues far more is at
stake than issues of access to particular neighborhoods because housing location is tied to the allocation of a broad range of
resources including school funding infrastructure and law enforcement Long after racial segregation has been outlawed
white privilege remains embedded in our culture of home ownership Sale of Communities United States. Congress. Joint
