Health and Public Health Practice,Committee to Review Data Systems for Monitoring HIV Care,2012-08-13 The number of
people living with HIV AIDS PLWHA in the United States is growing each year largely due both to advances in treatment that
allow HIV infected individuals to live longer and healthier lives and due to a steady number of new HIV infections each year
The U S Centers for Disease Control and Prevention CDC estimates that there were 1 2 million people living with HIV
infection in the United States at the end of 2008 the most recent year for which national prevalence data are available Each
year approximately 16 000 individuals die from AIDS despite overall improvements in survival and 50 000 individuals become
newly infected with HIV In 2011 the CDC estimated that about three in four people living with diagnosed HIV infection are
linked to care within 3 to 4 months of diagnosis and that only half are retained in ongoing care In the context of the
continuing challenges posed by HIV the White House Office of National AIDS Policy ONAP released a National HIV AIDS
Strategy NHAS for the United States in July 2010 The primary goals of the NHAS are to reduce HIV incidence increase
access to care and optimize health outcomes and reduce HIV related health disparities Monitoring HIV Care in the United
States addresses existing gaps in the collection analysis and integration of data on the care and treatment experiences of
PLWHA This report identifies critical data and indicators related to continuous HIV care and access to supportive services
assesses the impact of the NHAS and the ACA on improvements in HIV care and identifies public and private data systems
that capture the data needed to estimate these indicators In addition this report addresses a series of specific questions
related to the collection analysis and dissemination of such data Monitoring HIV Care in the United States is the first of two
reports to be prepared by this study In a forthcoming report also requested by ONAP the committee will address the broad
question of how to obtain national estimates that characterize the health care of people living with HIV in the United States
The second report will include discussion of challenges and best practices from previous large scale and nationally
representative studies of PLWHA as well as other populations **Autocar** ,2005 **Social Work and Community
Practice** Sharon Duca Palmer,2016-04-19 This title includes a number of Open Access chapters This book explores a variety
