SELF REFLECTION: Write a reflection on the problems and activities? Explain which one you enjoyed this activity? Why, or why not?

PIZZA FRACTIONS-5

Mr. and Mrs. Connor run a special every Sunday afternoon. If you buy a large pizza, they will give you a free slice. Help you celebrate. Your parents are going to help you celebrate. Read and answer the questions.

1. Large pizzas are cut into 8 slices. If you eat 3 slices, how many slices will you have left?

2. If you eat 3 slices, how many slices will you have left?

PIZZA DATA-1

Your grade took a poll on their favorite pizza topping. Now, you and your classmates must create a bar graph using the data collected. Shade the bar graph based on the data below. Then, answer the questions.

Topping	2	4	6	8	10	12	14	16
Pepperoni								
Mushrooms								
Ham								
Cheese								
Onion								
Tomatoes								
Mushrooms								

Based on the data, how many students are in your grade? **64 students**

2. There are four classes in your grade. All classes have the same number of students. How many students are in each class?

$64 \div 4 = 16$ students in each class

Steffe, John Olive, 2009-12-02 Children s Fractional Knowledge elegantly tracks the construction of knowledge both by children learning new methods of reasoning and by the researchers studying their methods The book challenges the widely held belief that children s whole number knowledge is a distraction from their learning of fractions by positing that their fractional learning involves reorganizing not simply using or building upon their whole number knowledge This hypothesis is explained in detail using examples of actual grade schoolers approaching problems in fractions including the schemes they construct to relate parts to a whole to produce a fraction as a multiple of a unit part to transform a fraction into a commensurate fraction or to combine two fractions multiplicatively or additively These case studies provide a singular journey into children s mathematics experience which often varies greatly from that of adults Moreover the authors descriptive terms reflect children s quantitative operations as opposed to adult mathematical phrases rooted in concepts that

do not reflect and which in the classroom may even suppress youngsters learning experiences Highlights of the coverage Toward a formulation of a mathematics of living instead of being Operations that produce numerical counting schemes Case studies children s part whole partitive iterative and other fraction schemes Using the generalized number sequence to produce fraction schemes Redefining school mathematics This fresh perspective is of immediate importance to researchers in mathematics education With the up close lens onto mathematical development found in Children s Fractional Knowledge readers can work toward creating more effective methods for improving young learners quantitative reasoning skills
