**Big Promises, Small Government** George M.

Abbott,2020-09-01 When Gordon Campbell s Liberal party won a massive majority on the strength of their New Era electoral platform in 2001 the premier s first act was to fulfill his campaign pledge to reduce personal income taxes Big Promises Small Government reveals the consequences of dramatic tax policy changes on social programs arguing for more sustainable taxation Despite sharply declining economic indices the new premier expected that lower taxes would spur investment and growth essentially paying for themselves Instead the precipitous and ideological decision to cut taxes and exempt health and education some 70 percent of the provincial budget from any decrease in expenditures left smaller ministries scrambling to absorb the cuts to maintain a balanced budget The damage was significant This insider recounting of the real world genesis implementation and consequences of a tax policy offers vital lessons to future governments and considerable insight into the role of taxes in society

*Between Caring & Counting* Lindsay Kerr,2006-12-15 One of the key planks of conservative Ontario premier Mike Harris s 1990s platform was education reform Amid a sea of official reports policy documents and expert opinions on education however the voices of actual classroom teachers were difficult to find This omission is redressed in Lindsay Kerr s*Between Caring Counting* Through a focus group of present day secondary school teachers in Toronto Kerr delivers a passionate account of the unassailably negative changes affecting secondary education and teachers work From a critical feminist perspective and using institutional ethnography Kerr situates the problem in education squarely as a conflict between an accounting logic and an ethic of care at the centre of education practice She exposes paradoxes inherent in education reform such as the increase of government control at the same time that government funding for education decreases She also connects educational restructuring to changes in the power relations of gender class and race across the

public education system These local changes she finds do not reflect sound pedagogy but the imperatives of neoliberal globalization Counteracting despair with hope Kerr explores self reflexive suggestions for teacher educators to exercise agency in their lives and to continue to work toward a just and equitable public education system Qualities of Education in a Globalised World Diane Brook Napier,2014-09-11 In a growing revisionist tradition comparative educational scholars challenge conventional assumptions about quality education as a singular undertaking dominated by standardised assessments and globalisation influences The contributors to this volume illustrate the complexities and global dimensions of educational quality that emerged in their research Several chapters critique educational reforms employing assessments aligned to global standards and large scale assessments revealing how considerations of contextual factors internal needs and local traditions are essential for developing a quality curriculum or for overhauling a national education system Most chapters interrogate the uses and misuses of standardised assessment results The contributors reveal the importance of asking critical questions about quality education how to access it and for what purposes what contextual and cultural factors are important what implementation issues and local level realities must be considered for true understanding of standardized assessment results what content skills and values are necessary and desirable ingredients what roles teachers and administrators play and what benefits accrue in terms of outcomes for employment and labor market needs or for achieving autonomy and stakeholder participation Critiques of narrow interpretations of standardised assessment data contrast with research based evidence that participation in large scale assessments such as PISA TIMSS and PIRLS can indeed be beneficial to identify needed reform refinements and implementation shortcomings Specific country cases include Brazil Canada the United States Spain Portugal Ukraine Kyrgyzstan and the Philippines Other chapters provide insights on quality education issues worldwide The volume offers readers a panorama of views on the diversity of paths to quality education

Clark, 2013-10-24 In a changing world that demands new skills a vital concern of public education is the gap in academic performance between low and high achieving students There is no excuse for the achievement gaps that persist among poor and minority students in schools today All students can succeed at high levels regardless of race ethnicity and economic background Several countries have successfully confronted inequities in achievement demonstrating that any school can close achievement gaps regardless of the community they serve and that all students can achieve at high levels when they are provided with the right opportunities This book is about understanding what factors selected countries have applied to promote progress and what factors contribute to progress in the closing of achievement gaps It is about creating opportunities for all students Closing the Achievement Gap from an International Perspective Transforming STEM for Effective Education is written in response to rising concern for the improvement of quality education especially in mathematics and science provided to all students The contributors take a systematic view of the subject beginning with a cross national analysis of teacher qualifications and the achievement gap that spans 50 countries The content of the book is organized in sections describing education around the globe North and South America Europe Asia Africa and Australia Individual chapters offer close up analysis of efforts to close achievement gaps in the U S and Canada Mexico England Turkey China South Africa and Australia among many others The contributors provide information on the achievement gap in mathematics and science review current research and present strategies for fostering improvement and raising performance with a focus on school related variables that adversely affect educational outcomes among poor and minority students The authors of the various chapters looked at how students data correlated with classroom practices teacher instruction and academic programming as part of their efforts to measure student growth Qualitative and quantitative data are provided to provide evidence not only of the problem but also for the solution The book concludes with a chapter on promoting equality and equity to shrink the achievement gap worldwide     **The Cult of**

**Efficiency** Janice Gross Stein, 2002 This thought provoking discourse on the unquestioned pursuit of efficiency reveals how the discussion of efficiency in the delivery of public goods such as education and health care has risen to prominence in postindustrial society Stein s provocative argument reminiscent of the thinking of Lewis Mumford demonstrates that efficiency can too often be a cloak for political agendas and that pressure for efficiency can actually be a detrimental rather than a positive force Citizens in public schools community clinics and hospitals are shown engaging directly with such agendas redrawing the face of the state as they impose new ways of delivering public goods Stein demonstrates how they are calling not only for efficiency but for accountability and choice as they confront the dilemmas of democratic processes in a global age     **NAFTA Revisited** Gary Clyde Hufbauer, Jeffrey J Schott, 2005-10-15 NAFTA entered into force in 1994 after a bitter Congressional debate But NAFTA in operation has proved no less controversial than NAFTA before ratification for both

supporters and opponents of trade liberalization have cited experience with the agreement to justify their positions To provide a factual basis for this ongoing debate the authors evaluate NAFTA s performance over the first seven years comparing actual experience with both the objectives of the agreement s supporters and the charges of its critics They then examine future challenges and opportunities in the trade and investment relationships among the three partner countries and the broader implications for new trade initiatives throughout the hemisphere
