Hieroglyph Stories And Visions For A Better Future:

Hieroglyph Ed Finn, Kathryn Cramer, 2023-11-21 Hieroglyph Stories Visions for a Better Future is an anthology of optimistic science fiction from some of today's most hopeful visionaries. This collection could be the shot in the arm our imaginations need. It's an important book and not just for the fiction. Wall Street Journal. Born of an initiative at the Center for Science and the Imagination at Arizona State University, this remarkable collection unites a diverse group of celebrated authors, prominent scientists, and creative visionaries who contributed works of techno-optimism that challenge us to imagine, fully think broadly, and do Big Stuff, reigniting the iconic visions of the golden age of science fiction. Inside this volume are marvels of imagination and possibility, including a steel tower so tall that the stratosphere is just an elevator ride away, a drone-powered Internet, crowd-funded robots descending on the moon, cities that work like a single cell of algae powered entirely by the sun, and much more. Engaging, mind-bending, provocative, and imaginative. Hieroglyph Stories and Visions for a Better Future offers a forward-thinking approach to the intersection of art and technology that has the power to change our world. Introduction by editors Ed Finn and Kathryn Cramer. Foreword by Lawrence M. Krauss. Interview with Paul Davies. Stories by Charlie Jane Anders, Madeline Ashby, Elizabeth Bear, Gregory Benford, David Brin, James L. Cambias, Brenda Cooper, Cory Doctorow, Kathleen Ann Goonan, Lee Konstantinou, Geoffrey A. Landis, Annalee Newitz, Rudy Rucker, Karl Schroeder, Viranda Singh, Neal Stephenson, and Bruce Sterling. The Integration of the Humanities and Arts with Sciences, Engineering, and Medicine in Higher Education. National Academies of Sciences, Engineering, and Medicine, Policy and Global Affairs, Board on Higher Education and Workforce, Committee on Integrating Higher Education in the Arts, Humanities, Sciences, Engineering, and Medicine, 2018-06-21. In the United States, broad study in an array of different disciplines: arts, humanities, science, mathematics, engineering, as well as an in-depth study within a special area of interest. Have been defining characteristics of a higher education. But over time, in-depth study in a major discipline has come to dominate the curricula at many institutions. This evolution of the curriculum has been driven in part by increasing specialization in the academic disciplines. There is little doubt that disciplinary specialization has helped produce many of the achievements of the past century. Researchers in all academic disciplines have been able to delve more deeply into their areas of expertise, grappling with ever more specialized and fundamental problems. Yet today many leaders, scholars, parents, and students are asking whether higher education has moved too far from its integrative tradition towards an approach heavily rooted in disciplinary silos. These silos represent what many see as an artificial separation of academic disciplines. This study reflects a growing concern that the approach to higher education that favors disciplinary specialization is poorly calibrated to the challenges and opportunities of our time. The Integration of the Humanities and Arts with Sciences, Engineering, and Medicine in Higher Education examines the evidence behind the assertion that educational programs that mutually integrate learning experiences in the humanities and arts with science, technology, engineering, mathematics, and medicine (STEMM) lead

to improved educational and career outcomes for undergraduate and graduate students It explores evidence regarding the value of integrating more STEM curricula and labs into the academic programs of students majoring in the humanities and arts and evidence regarding the value of integrating curricula and experiences in the arts and humanities into college and university STEM education programs

Keeping Up with Emerging Technologies Nicole Hennig, 2017-06-21 The acceleration of technological change demands that today s information professionals and educators not only be constantly acquiring new knowledge and skills but also that they cultivate the ability to make sound judgments on which technologies to embrace Today s librarians and information specialists know it s imperative that they keep up with new technologies But not all technologies are equally important either within the library setting or to library patrons So how does one decide which ones to pursue and integrate into services In the uphill battle to stay current with new and emerging technologies deciding which ones to pursue and integrate into services is a major challenge A secondary problem is simply finding the time to consider the question Readers of Keeping Up with Emerging Technologies will learn all of the best practices and skills to keep up with new technologies and to analyze the ability of specific technologies to meet recognized user needs all in this single source You ll learn the best ways to gather information about new technologies and user needs to evaluate and analyze information to curate technology information for others to set up experiments and evaluate the results and to present your findings to persuade decision makers Written by the former head of user experience at MIT s library system this guidebook serves information professionals educators education technology specialists and anyone with emerging technology or innovation in their job titles It will also be useful for library administrators and those who manage these positions as well as for students seeking a technology oriented or curriculum design career path in libraries

Transhumanism Andrew Pilsch, 2017-08-15 Transhumanism posits that humanity is on the verge of rapid evolutionary change as a result of emerging

technologies and increased global consciousness However this insight is dismissed as a naive and controversial reframing of posthumanist thought having also been vilified as the most dangerous idea in the world by Francis Fukuyama In this book Andrew Pilsch counters these critiques arguing instead that transhumanism's utopian rhetoric actively imagines radical new futures for the species and its habitat Pilsch situates contemporary transhumanism within the longer history of a rhetorical mode he calls evolutionary futurism that unifies diverse texts philosophies and theories of science and technology that anticipate a radical explosion in humanity's cognitive physical and cultural potentialities By conceptualizing transhumanism as a rhetoric as opposed to an obscure group of fringe figures he explores the intersection of three major paradigms shaping contemporary Western intellectual life cybernetics evolutionary biology and spiritualism In analyzing this collision his work traces the belief in a digital evolutionary and collective future through a broad range of texts written by theologians and mystics biologists and computer scientists political philosophers and economic thinkers conceptual artists and Golden Age science fiction writers Unearthing the long history of evolutionary futurism Pilsch concludes allows us to more clearly see the novel contributions that transhumanism offers for escaping our current geopolitical bind by inspiring radical utopian thought

Dis-Orienting Planets Isiah Lavender III, 2017-04-07 Contributions by Suparno Banerjee Cait Coker Jeshua Enriquez Joan Gordon Veronica Hollinger Malisa Kurtz Stephanie Li Bradford Lyau Uppinder Mehan Graham J Murphy Baryon Tensor Posadas Amy J Ransom Robin Anne Reid Haerin Shin Stephen Hong Sohn Takayuki Tatsumi and Timothy J Yamamura Isiah Lavender III's *Dis-Orienting Planets* amplifies critical issues surrounding the racial and ethnic dimensions of science fiction This edited volume explores depictions of Asia and Asians in science fiction literature film and fandom with particular regard to China Japan India and Korea *Dis-Orienting Planets* highlights so-called yellow and brown peoples from the constellation of a historically white genre The collection launches into political representations of Asian identity in science fiction's imagination from fear of the Yellow Peril and its racist stereotypes to techno Orientalism and the remains of a postcolonial heritage Thus the essays by contributors such as Takayuki Tatsumi Veronica Hollinger Uppinder Mehan and Stephen Hong Sohn reconfigure the very study of race in science fiction A follow up to Lavender's *Black and Brown Planets* this collection expands the racial politics governing the renewed visibility of Asia in science fiction One of the few on this subject the volume probes Gary Shteyngart's novel *Super Sad True Love Story* the acclaimed film *Cloud Atlas* and Guillermo del Toro's monster film *Pacific Rim* among others *Dis-Orienting Planets* embarks on a wide-ranging assessment of Asian representations in science fiction upon the determination that our visions of the future must include all people of color

When Mothers Dream Brenda Cooper, 2025-08-12 Award-winning writer Brenda Cooper celebrates the strength of the female in many guises mother daughter engineer biologist and more From a young dreamer who fights to protect the endangered Southern Resident Killer Whales to two older women whose grandchildren are being raised by AIs to a future scientist who tries to keep the world safe from bioengineered creatures *When Mothers Dream* explores the edges of what can be possible if we

celebrate the strength of women The collection mixes new and previously published speculative work The bouquet of science fiction fantasy and poetry is tied together with a thread of hope and a colored with a touch of anger It includes the voices of whales It is a book for our times When Mothers Dream is about fighting for our future Women can save us all *Essays in Narrative and Fictionality* Brian Richardson,2021-06-24 This book brings together several major essays on foundational topics of narrative studies and the theory of fictionality by one of the preeminent figures of postclassical narrative theory It reexamines and reconceives the role of the author the status of implied authors the model for unnatural narrative theory the nature of narrative and the ideological implications of narrative forms It also explores the status of historical characters in fictional texts the paradoxes of realism the presence of multiple implied readers the role of actual readers and the question of fictionality In addition an appendix offers a useful approach for teaching narrative theory The book includes analyses of works by Conrad Joyce Woolf Nabokov Beckett Jeanette Winterson Deborah Eisenberg and others Throughout it argues for a more expansive conception of narrative theory and keen attention to the nature and difference of fiction This provocative book makes crucial interventions in ongoing critical debates about narrative theory literary theory and the theory of fictionality and is essential reading for all students of narrative **Playing Utopia** Benjamin Beil,Gundolf S.

Freyermuth,Hanns Christian Schmidt,2019-11-07 Media narratives inform our ideas of the future and Games are currently making a significant contribution to this medial reservoir On the one hand Games demonstrate a particular propensity for fantastic and futuristic scenarios On the other hand they often serve as an experimental field for the latest media technologies However while dystopias are part of the standard gaming repertoire Games feature utopias much less frequently Why This anthology examines playful utopias from two perspectives It investigates utopias in digital Games as well as utopias of the digital game that is the role of ludic elements in scenarios of the future *Innovation, Between Science and Science Fiction* Thomas Michaud,2017-06-29 Fantasy and science fiction are both involved in the process of innovation in techno scientific societies Long regarded as a hindrance to rationality and to science science fiction has become the object of praise in recent decades Innovative organizations use science fiction to stimulate the creativity of their teams and more and more entrepreneurs are using its influence to develop innovation Scientific practice relies in part on an imaginary dimension The mapping of the technical imagination of science fiction has become an important strategic issue as has its patentability The conquest of space the construction of cyberspace and virtual reality biotechnologies and nanotechnologies are all at the center of futuristic fictions that participate in scientific speeches and discoveries **The Nature of Tomorrow** Michael Rawson,2021-11-16 An examination of how Western visions of endless future growth have contributed to the global environmental crisis For centuries the West has produced stories about the future in which humans use advanced science and technology to transform the earth Michael Rawson uses a wide range of works that include Francis Bacon s New Atlantis the science fiction novels of Jules Verne and even the speculations of think tanks like the RAND Corporation to reveal the

environmental paradox at the heart of these narratives the single minded expectation of unlimited growth on a finite planet Rawson shows how these stories which have long pervaded Western dreams about the future have helped to enable an unprecedentedly abundant and technology driven lifestyle for some while bringing the threat of environmental disaster to all Adapting to ecological realities he argues hinges on the ability to create new visions of tomorrow that decouple growth from the idea of progress

Geography of Time, Place, Movement and Networks, Volume 1 Stanley D. Brunn, 2024-05-23 This book describes the journey concept relating to cultural and social history of Western and non Western worlds By including time journeys negotiated by women racial minorities artists and scholars from the humanities and social natural and physical scientists the book explores time space journeys in personal professional and cultural life and place experiences The sixteen chapters in this book offer new insights into time place worlds in different contexts including history culture astronomy and science fiction The concept is one where science and art worlds intersect in the emerging worlds of the unknown With contributors from different disciplines and countries expanding our understanding of this concept this volume provides a valuable source for disciplinary and interdisciplinary classes and seminars exploring these scholarly frontiers

The Cross, the Plow and the Skyline Ernest J. Yanarella, 2022-03-01 The apocalyptic pastoral and urban traditions have fundamentally shaped Western history and influenced American religion culture and politics This book argues that these traditions have not only been decisive in giving form and substance to classic and modern American literature but have been appropriated by contemporary science fiction As a loosely connected set of cultural narratives the Cross the Plow and the Skyline have through the medium of science fiction and fantasy provided a bold vista on the future grounded in an emergent ecological imagination In the expanded second edition of the original 2001 publication the author argues that a significant shift has taken place in contemporary Anglo American science fiction and fantasy SF F from twentieth century SF F critically analyzed in the first edition s critical inquiry Avantgarde works in twenty first century speculative fiction extensively examined in representative works in interludes separating the slightly revised original chapters have become darker in their visions of the possible future more focused on slowness over breakneck speed more amenable to gender racial and global diversity in authorship plot and subgenre creation less attached to anchor concepts like the city wilderness and the domesticated landscape in plot development more prone to dystopian and critical dystopian tropes simultaneously more open toward but critical of Young Adult fiction and more supportive of the breakdown of borders and antagonisms between science fiction and fantasy and SF F and literary fiction Ensconced in the cultural social and political zeitgeist of the New Millennium s first two decades these features of twenty first century science fiction and fantasy may yet settle into and inform emergent and pluralistic varieties of ecological politics spreading across the globe and confronting the Earth s social and environmental crises of our times and coming decades
