Light Patrol

Cat. 630/3, 630/3A and 630/3ABL

Instruction Manual

2 Introduction

The Light Patrol Security Sensor incorporates a passive infrared detector that reacts instantly to body heat and movement. When it senses a person (at a distance of up to 12 metres) it acts as a switch to turn the lights on to which it is connected. When body heat and movement are no longer detected, the lights switch off after a period of time (adjustable). A built-in photocell deactivates the motion sensor during daylight hours if required.

3 Features

The Light Patrol provides convenience, security, and safety. Convenience for family and friends, lighting their way and making keys easier to locate. Security from intruders who are unexpectedly blasted by light, which usually has the effect of scaring them off. Safety by avoiding accidents caused by unseen obstacles.

4 When installing the security sensor pay special attention to these points

1. Do not install when it is raining.
2. Be sure to switch off power source before installing.
3. Make sure the power wiring comes from a circuit protected by a suitable fuse or circuit breaker.
4. For outdoor installation, a location under eaves is preferable.
5. This unit must be installed by a licensed electrician according to local codes and regulations.

5 Sensor locations to be avoided

- Directed at swimming pools and ponds. The movement and reflections are likely to create nuisance switching.
- Avoid, if possible, areas which are accessible to animals.
- A position which is subject to drastic changes in temperature.
- In proximity of air conditioner, dryer or heater.
- In direct sunlight.
