of Analog Electronic Controllers in HVAC Systems R. Kirts, NAVAL CIVIL ENGINEERING LAB PORT HUENEME CA., 1984 The calibration of analog electronic proportional controllers requires the knowledge of at least three characteristics of the controller the action the setpoint and the throttling range The calibration procedure follows these steps Measure the controller input s Calculate the predicted controller output Measure the actual controller output and Adjust the controller as required Using this procedure controller performance is evaluated at the control point or actual condition rather than the setpoint which is the idealized desirable condition This means that only those controllers which are actually out of calibration need to be adjusted controllers that are in calibration need not have any settings or adjustments changed If a controller cannot be calibrated or will not remain calibrated for a responsible period of time it is defective and should be repaired or replaced *Acoustic Transducer Calibration Software User's Guide for the Labview 3.1 Environment*, 1995 This document gives operating instructions and general information regarding the Labview 3.1 implementation of software for the calibration of acoustic transducers Sections of the document cover the following topics calibration of hydrophones using tone bursts or continuous wave CW calibration of projectors using tone bursts or CW calibration of hydrophones using pseudo random noise transducer directivity measurements and calibration of transducers by the reciprocity method
