**Manned Satellite Capsule** NASA,2011-05-01 On October 4 1957 at 10 28 Moscow time a rocket carrying the world's first orbiting satellite roared into space signaling a new era in human history and the beginning of the so called space race an epic rivalry pitting the technological know how of the Soviet Union against that of the United States Despite some highly publicized failures the USA managed to answer the Russians with the successful launch of Explorer 1 in January of 1958 The next major milestone would be to put a human into orbit a goal that defined the USA's Project Mercury After a long series of test launches including a sub orbital flight with the chimp Ham on board Mercury astronaut Alan Shepard became the first American in space On May 5 1961 Shepard rode a Redstone rocket into space for a sub orbital flight that lasted under 16 minutes Nine months later John Glenn's Friendship 7 capsule was launched into space atop an Atlas booster and Glenn became the first American to orbit the earth Glenn remained in space for nearly five hours and circled the planet three times While these flights represented enormous achievements neither was an outright space race victory cosmonaut Yuri Gagarin's orbital flight of April 12 1961 earned him the title of first man in space and first man to orbit the Earth Designed by brilliant engineer Max Faget and a team at NASA the Mercury space capsule represented an entirely new class of vehicle Just large enough for a single astronaut the joke about the cramped capsule was that it was worn not ridden Despite reports otherwise the capsule could be and was flown by astronauts who had attitude control thrusters at their disposal and a window for viewing The capsule also boasted manual re entry controls Created by NASA and contractor McDonnell Aircraft this Familiarization Manual explains all the systems aboard the Mercury space capsule including cabin controls environmental and stabilization controls and systems launch and re entry sequence procedures and navigation and communications equipment and procedures Dating from June of 1962 it represents a late revision of documents created at the beginning of the Mercury program Originally restricted this manual has been declassified and is presented in its entirety running nearly 400 pages      Technical Manual United States Department of the Army,1971      *Air Force Manual* United States. **The Great American Jet Pack** Steve Lehto,2013-05-01 Tracing the remarkable history of a certain kind of flying machine from the rocket belt to the jet belt to the flying platform and all the way to Yves Rossy s 21st century free flights using a jet powered wing this historical account delves into the technology that made these devices possible and the reasons why they never became commercial successes on a mass scale These individual lift devices as they were blandly labeled by the government men who financed much of their development answered man s desire to simply step outside and take flight No runways no wings no pilot s license were required But the history of the jet pack did not follow its expected trajectory and the devices that were thought to become as commonplace as cars have instead become one of the most overpromised technologies of all time This fascinating account profiles the inventors and pilots the hucksters and cheats and the businessmen and soldiers who were involved with the machines and it tells a great American story of a technology whose promise may yet one day come to fruition
