Memorandum Rand Corporation,1970 *Transport, Energy and CO2* International Energy Agency,2009 Car ownership is set to triple by 2050 trucking activity will double and air travel could increase fourfold This book examines how to enable mobility without accelerating climate change it finds that if changes are made to the way people travel adoption of technologies to improve vehicle efficiency and a shift to low CO2 fuels it is possible to move onto a different pathway where transport CO2 emissions by 2050 are far below current levels at costs that are lower than many assume the report discusses the prospects for shifting more travel to the most efficient modes and reducing travel growth rates improving vehicle fuel efficiency by up to 50% using cost effective incremental technologies and moving toward electricity hydrogen and advanced biofuels to achieve a more secure and sustainable transport future If governments implement strong policies to achieve this scenario transport can play its role and dramatically reduce CO2 emissions by 2050 *Defenders of Japan* Garren

Congress. Senate. Committee on Appropriations. Subcommittee on Foreign Operations, Export Financing, and Related Programs, 1992 *Ethical Issues in Aviation* Elizabeth A. Hoppe, 2018-10-16 The aviation industry is unique in two major ways firstly it has a long history of government involvement dating back to the early days of aviation and secondly its primary concern is the safety of its passengers and crew These

features highlight the importance of ethical decision making at all levels of the industry. However, well publicized problems such as the disappearance of Malaysia Airlines Flight 370 highlight the need for ethics to take a more prominent role in the field. *Ethical Issues in Aviation* focuses on both past and current topics in aviation, providing the reader with an overview of the major themes in aviation ethics that cover a broad range of subjects. Contributors include academics who do research in the field as well as professionals who provide first hand accounts of the ethical situations that arise in the aviation industry. This second edition has been thoroughly revised throughout to bring it up to date and features several new chapters that cover recent events and topics. This book enhances student learning by providing faculty, students and those interested in aviation with discussion of the most pressing ethical issues that continue to impact the industry.

Emerging Legal Orders in the Arctic Akiho Shibata, Leilei Zou, Nikolas Sellheim, Marzia Scopelliti, 2019-04-11. More than ever before, the changing environmental and political landscape in the Arctic requires stability and foreseeability based on resilient common norms. The emerging legal orders in the Arctic cannot be legitimately created or effectively implemented unless all relevant actors are involved. Simultaneously, it must always be based on respect for the sovereign rights of the eight Arctic states in the region as well as the tradition and cultural livelihood of the local communities. It is this delicate balance between Arctic and non-Arctic interests that is the core problematique for the emerging legal orders in the Arctic. *Emerging Legal Orders in the Arctic* critically examines the role of non-Arctic actors in this advancement of the shape and scope of the Arctic legal order. Discussing the admittance and participation of Observer states and organisations in the Arctic Council, including task force meetings where new treaties are negotiated, it details the issues and successes this can result in. Setting up the context of the current legal orders in the Arctic, the book discusses Asian indigenous and European perspectives amongst others. There is a strong focus on the groundbreaking fisheries agreement of November 2017 in the Central Arctic Ocean (CAO) and the impact on both Arctic and non-Arctic actors. Interests in marine living resources, scientific cooperation and the Arctic shipping regimes and governance are also thoroughly discussed from multiple perspectives. The book combines the expertise of academics and practitioners in the fields of international law and Arctic governance, uniquely focusing on Asian actors in the Arctic legal order. The resulting study is a fascinating insight into the interplay between non-Arctic actors and the Arctic legal order and will be invaluable to academics in the field of Arctic and international law.

Identity Change and Foreign Policy Linus Hagstrom,2015-10-05 Identity has become an explicit focus of International Relations theory in the past two to three decades with one case attracting and puzzling many early identity scholars Japan These constructivist scholars typically ascribed Japan a pacifist or antimilitarist identity an identity which they believed was constructed through the adherence to peaceful norms and antimilitarist culture Due to the alleged resilience of such adherences little change in Japan s identity and its international relations was predicted However in recent years Japan s foreign and security policies have begun to change in spite of these seemingly stable norms and culture This book seeks to address these changes through a pioneering engagement with recent developments in identity theory In particular most chapters theorize identity as a product of processes of differentiation Through detailed case analysis they argue that Japan s identity is produced and reproduced but also transformed through the drawing of boundaries between self and other In particular they stress the role of emotions and identity entrepreneurs as catalysts for identity change With the current balance between resilience and change contributors emphasize that more drastic foreign and security policy transformations might loom just beyond the horizon This book was originally published as a special issue of The Pacific Review
