1999 September: "Fishing for Answers" on page 1016. (10) Q4: "consequence" means "immediately" (I realize it's incorrect and I don't know how to fix it). The question is: "What is the consequence of the fact that the fish are not eating?"

Abstract: In the temperate zone, forest fires are frequent and a large number of species depend on the fire cycle for their reproduction. In this study, we examined the effects of fire on the reproduction of 10 species of plants in a temperate forest. We found that fire had a significant effect on the reproduction of most species, with some species showing a significant increase in reproduction after fire.
