2nd Edition

FIRST AID FOR UNCONSCIOUS ADULT OR CHILD

**A**ccidents can happen, anywhere, anytime. Knowing how to provide proper care can save a life. First aid can range from calling emergency medical personnel (911) to performing more advanced procedures such as administering CPR. Guidelines in this chart are specific to "non health care professionals".

## STEP 1: SURVEY THE SCENE

- If there is any kind of danger, call Emergency Medical Services (EMS) (911) first.
- Ensure the scene is safe for you and others.
- Look for things that may threaten your safety, such as fire, electrical wires, or dangerous terrain.
- If you feel your safety is threatened, stay back and allow professionals to handle any dangerous situations.

## STEP 2: CHECK FOR RESPONSIVENESS

- Gently tap casualty and shout "Are you okay?"
- If the casualty responds, begin a Secondary Survey (see pg. 2).
- If the casualty is conscious but appears to be choking, use "First Aid for Conscious Adult or Child with Complete Airway Obstruction".
- If the casualty does not respond, send someone to call EMS (911). If no one else is available, place the call yourself, then return and begin the Primary Survey (see below).
- If you are alone and dealing with a child or infant, give care for 2 minutes first, then call EMS (911).

## STEP 3: PRIMARY SURVEY

- The Primary Survey will help you to determine if any conditions threaten the casualty's life.
- Roll the casualty onto his or her back if they are not breathing or only gasping. If the casualty's position keeps you from checking their breathing:
  - o Kneel beside the casualty on the side they are not facing.
  - o Roll the casualty toward you, "face upward" - as a single unit - do not twist.
  - o Support back of the casualty's head and neck.
- Once you have determined that the casualty is not breathing or only gasping and have rolled them onto their back, proceed to step 3a.
- Remember **CAB**: circulation, always, something.
- If the casualty is breathing normally, proceed to step 4a. Check for Control Severe Bleeding.

- If the person starts breathing or begins to vomit, place them into recovery position (see pg. 2).
- If the person is showing signs of an injury or illness, provide on-going casualty care until EMS (911) arrives.

## STEP 3: PRIMARY SURVEY (CONT.)

### 3a. CIRCULATION: Begin Compressions

#### CPR for Adults (18+ Years)

**Hand Placement:** (see Fig. A)  
Place the heel of your hand on the person's sternum in the center (midline) between chest nipples. Straighten your arms, then place the heel of the second hand on top of the first so that the hands are overlapped, interlocked and parallel.

**Give 30 Compressions:** (see Fig. B)

- Position shoulders over hands.
- Compress sternum at least 2 inches (5 cm) down and up smoothly at a rate of at least 100 times per minute.
- Keep hands in contact with the chest at all times.
- Push hard, push fast. Allow for complete recoil of chest between compressions.
- If the break, check hand position and re-aligning, do not stop.

#### CPR for Children (1-18 Years)

**Hand Placement:**  
Position is the same as for adult. Compress chest in the center (midline) and push hard and fast. You can use one or two hands to do compressions.

#### CPR for Infants (Under 1 Year)

**Hand Placement:** (see Fig. C)  
Place two fingers on the middle of the chest (midline) just below the infant's nipples.

**Give 30 Compressions:**

- Compress sternum at least 1/2 inches (1 cm) down and up smoothly at a rate of at least 100 times per minute.
- Keep fingers in contact with the chest at all times.
- Push hard, push fast. Allow for complete recoil of chest between compressions.

### 3b. AIRWAY: Open the Airway

- Do "head-tilt-chin-lift" if neck injury is not suspected (see Fig. D).
- If head/neck injury is suspected and the person is not breathing, "non professional" rescuers are recommended to get an airway device using the "head-tilt-chin-lift". It is more difficult to do and is therefore not recommended.

### 3c. BREATHING: Give 2 Fast Breaths

- Pinch nose and give 2 breaths of air, each lasting 1 second (see Fig. E).

- Watch to see that chest rises as breaths go in.
- If breaths does not go in, adjust airway by tilting the head further back (reposition) and give another breath.

- For infants to use a mouth-to-mouth airway technique (see Fig. F).
- To do this, use your mouth to cover a nose and the infant's mouth and nose.
- If you have difficulty making an effective seal, try either mouth-to-mouth ventilation (pinch the infant's closed mouth) or mouth-to-nose ventilation (cover the mouth).

#### BREATHS STILL DO NOT GO IN

- Do first aid for unconscious choking adult or child, or first aid for infant with complete airway obstruction.

#### BREATHS GO IN

- Deliver another 30 compressions, followed by 2 breaths. Continue cycle until:
  - The area becomes dangerous.
  - You are too physically exhausted to continue.
  - EMS (911) arrives.
- The person starts breathing or begins to vomit.
- Another trained rescuer takes over.
- Someone arrives with an AED (Automated External Defibrillator).

### **First Aid For Children Quick Reference Guide Introduction**

In the digital age, access to information has become easier than ever before. The ability to download First Aid For Children Quick Reference Guide has revolutionized the way we consume written content. Whether you are a student looking for course material, an avid reader searching for your next favorite book, or a professional seeking research papers, the option to download First Aid For Children Quick Reference Guide has opened up a world of possibilities. Downloading First Aid For Children Quick Reference Guide provides numerous advantages over physical copies of books and documents. Firstly, it is incredibly convenient. Gone are the days of carrying around heavy textbooks or bulky folders filled with papers. With the click of a button, you can gain immediate access to valuable resources on any device. This convenience allows for efficient studying, researching, and reading on the go. Moreover, the cost-effective nature of downloading First Aid For Children Quick Reference Guide has democratized knowledge. Traditional books and academic journals can be expensive, making it difficult for individuals with limited financial resources to access information. By offering free PDF downloads, publishers and authors are enabling a wider audience to benefit from their work. This inclusivity promotes equal opportunities for learning and personal growth. There are numerous websites and platforms where individuals can download First Aid For Children Quick Reference Guide. These websites range from academic databases offering research papers and journals to online libraries with an expansive collection of books from various genres. Many authors and publishers also upload their work to specific websites, granting readers access to their content without any charge. These platforms not only provide access to existing literature but also serve as an excellent platform for undiscovered authors to share their work with the world. However, it is essential to be cautious while downloading First Aid For Children Quick Reference Guide. Some websites may offer pirated or illegally obtained copies of copyrighted material. Engaging in such activities not only violates copyright laws but also undermines the efforts of authors, publishers, and researchers. To ensure ethical downloading, it is advisable to utilize reputable websites that prioritize the legal distribution of content. When downloading First Aid For Children Quick Reference Guide, users should also consider the potential security risks associated with online platforms. Malicious actors may exploit vulnerabilities in unprotected websites to distribute malware or steal personal information. To protect

themselves, individuals should ensure their devices have reliable antivirus software installed and validate the legitimacy of the websites they are downloading from. In conclusion, the ability to download First Aid For Children Quick Reference Guide has transformed the way we access information. With the convenience, cost-effectiveness, and accessibility it offers, free PDF downloads have become a popular choice for students, researchers, and book lovers worldwide. However, it is crucial to engage in ethical downloading practices and prioritize personal security when utilizing online platforms. By doing so, individuals can make the most of the vast array of free PDF resources available and embark on a journey of continuous learning and intellectual growth.
