## Rounding Numbers

When rounding, the digit to the right of the requested rounding digit will always tell you whether to round up or down and all digits to the left will stay the same.

**Rule 1.** Determine what your rounding digit is and look to the right side of it. If the digit is 1, 2, 3 or 4 do not change the rounding digit. All digits that are on the right hand side of the requested rounding digit will become 0.

**Rule 2.** Determine what your rounding digit is and look to the right of it. If the digit is 5, 6, 7, 8 or 9, your rounding digit rounds up by one number. All digits that are on the right hand side of the requested rounding digit will become 0.

Round to the nearest 10 - Examples:  $43 = 40$      $257 = 260$      $1490 = 1490$      $1375 = 1380$
