Genetically Modified Food Andy Rees, 2006-08-20 Written by a leading campaigner for GM Watch one of the world's leading lobbying groups this book reveals the huge issues that are at stake Genetically modified food has been headline news for years but it's difficult to know how far the genetic revolution has affected our lives Is the food on our shelves free of genetically engineered ingredients How much power do food corporations wield Andy Rees provides the answers He shows that while corporations that produce genetically modified food have met with resistance in Europe their hold on the US market is strong They're also expanding operations in less regulated countries in Africa Asia and the former Soviet bloc The US has launched a legal suit to attempt to force the European market open to genetically modified food What does the future hold This brilliantly readable book tells us all we need to know **Genetically Modified Foods** Salah E. Genetically Modified Food Marie Kreipe, 2010 The controversial issue of genetically modified GM food is discussed in this book While the United States US is a strong supporter of GM technology having adopted a rather lax regulation of trade with GM products the European Union EU is representing a sceptical position towards this new technology and has even imposed a de facto moratorium on further approval of GM products from 1998 to 2004 The purpose of this book is an extensive analysis of the current status on risks and benefits of genetically modified organisms GMOs and a suggestion on how an appropriate regulation of GM products could be derived Potential guidelines are provided for policy formulation both in a qualitative and in a quantitative dimension The US is applying the principle of substantial equivalence which means that GM products are in their substance identical to products produced by conventional methods Therefore no new regulations are necessary for the trade with GM products In contrast the European Union EU disagrees that GM products are equivalent to their conventional counterparts due to the different production process Instead the EU refers to the precautionary principle in its GMO policy meaning that trade with GM products should be restricted until it will be proven that no additional risks are implied by the use of these products The divergence of opinions about the right policy to regulate GM products has significant impacts on trade flows and welfare effects The US and the EU have already tried to resolve their dispute before the World Trade Organization WTO Relevant laws of the General Agreement on Tariffs and Trade GATT and the WTO are presented as well as indications for a potential consensus *Genetically Modified Food* Noël
