### Ecology Review Worksheet #1

**Main Idea:** Ecologists study environments at different levels of organization.

Write a description of each level of organization in the table. Also, provide an example for each level.

Level	Description	Example
1. Organism	Anything with all of the characteristics of life.	Deer
2. Population	The amount of one species that live in an area	# of deer
3. Community	All of the different species that live in an area	People + dogs + deer
4. Ecosystem	Living and nonliving things in an environment	Forest
5. Biosphere	Part of the earth that supports life	Earth

Fill in the diagram below with the Levels of Organization studied in Ecology.

Use the terms from the table above.

**Main Idea:** An ecosystem includes both abiotic and biotic factors. Producers provide energy for other organisms in an ecosystem.

Complete the following sentences with the correct term from the list below

autotrophs	eating	nonliving	abiotic	living	temperature	producers
moisture	plants	animals	biotic	consumers	heterotrophs	nonliving

6. All ecosystems are made up of **living** and **nonliving** components.

7. **Biotic** factors are living things, such as **plants** or **animals**.

8. **Abiotic** factors are nonliving things, such as wind, **Temperature**, or **moisture**.

9. **Autotrophs** are organisms that get their energy from **nonliving** resources, meaning they make their own food. These organisms are also called **Producers**.

10. **Heterotrophs** are organisms that get their energy by **eating** other organisms. These organisms are also called **consumers**.

11. Why are producers so important to an ecosystem? **They are the base of the food chain!**

### **Essentials of Health, Culture, and Diversity**

Mark Edberg, 2022-03-24 With diversity increasingly becoming the norm, it has become even more essential for students and those planning to work in public health to have more than a cursory understanding of the important cultural dimension of the human societies and groups with whom they will be partners. *Essentials of Health, Culture and Diversity: Understanding People, Reducing Disparities*, Second Edition, examines what is meant by culture and the ways which culture intersects with health issues and explores how public health efforts can benefit by understanding and working with cultural processes. Using a range of conceptual tools and research methods, this text provides an overview of specific domains where culture and health intersect, including varying definitions of health, well-being, understandings of health risk, illness causation and treatment theories, ethnomedical systems, healing/curing traditions, the relationship between health risk, vulnerability and socio-cultural structures, gender and health, and the meaning of cultural competency. A brief review of a range of cases and examples that span several health issues where health problems as well as health interventions were impacted by cultural factors. An overview of research methods that focus on obtaining cultural data. A focus on four current public health issues where culture and health intersect: HIV/AIDS, obesity, youth violence, and the COVID-19 epidemic. An exploration of the ways in which an awareness of the culture/health relationship can inform public health work both domestic and international. Real-life examples and profiles as well as suggested exercises and activities help readers in understanding concepts and their application. Two in-depth case studies on autism spectrum disorder and indigenous historical trauma illustrate the broad scope interactions between culture and health.
