Focusing event: *(how will you get the students' attention?)*

Each student will get a sticky note and will put their first names on it. On the white board will be written the categories A-D; E-H; I-L; M-P; Q-T; U-Z. Students will be directed to put their note on the board. I will ask why students placed their names where they did. We will likely sort out that they were done by putting it under the range it would alphabetically fall. But are they in alphabetical order? One student from each table will be picked to put the names under each range in alphabetical order.

Input from you: *(what are you teaching & how are you delivering the content?)*

How is alphabetical order useful to us? It's a way to organize information, and it's really common in many sources. Many times, everything is in alphabetical order, but like the letters were our guides for our names, reference sources use guides so you can figure out if what you are looking for belongs on that page, or if it will come before or after.
