

Introducing the Concept Properties of Multiplication

As soon as students begin multiplying numbers, they start to unknowingly test different mathematical properties and concepts. When introducing multiplication properties such as the commutative property, associative property, identity property, and zero property, it is important to provide several effective examples of each new property as well as adequate time for students to learn how to identify these properties. In this lesson, the commutative property of multiplication is introduced.

Materials: Overhead projector, string, manipulatives such as counters or cubes for students

Preparation: Arrange students in pairs. Each pair should have 50 or more counters or cubes and twenty 12-inch strings.

- On the overhead projector, arrange counters in 3 groups with 4 objects in one group, 5 objects in another group, and 6 objects in another group. Use an overhead marker to draw a ring around each group.
- **Ask:** *How many groups do I have? How many objects are in each group? Can we use multiplication to find the total number of counters? Why or why not?*
Students should recognize that there are 3
