This study focused on the interrelations among different domains of maternal adaptation (i.e., emotion-regulation difficulties, depressive symptoms, and couple-relationship satisfaction) over the transition to parenthood and also their associations with mothers' recalled childhood maternal nonsupportive emotion socialization. Data were obtained from a socioeconomically and racially diverse sample of 196 primiparous mothers during the 3rd trimester of pregnancy and at 6 months postpartum. Results indicated that (a) mothers' adaptation in different domains had shared roots in their recalled childhood maternal nonsupportive emotion socialization; (b) maternal adaptation in various domains were interrelated with rather than independent of each other, and such associations were unidirectional rather than reciprocal (e.g., mothers' prenatal couple-relationship satisfaction was negatively associated with their depressive symptoms at 6 months postpartum rather than the reverse); and (c) mothers' adaptation in a given domain served as the mechanism via which their recalled childhood maternal nonsupportive emotion socialization shaped their other domains (e.g., mothers' recalled maternal nonsupportive emotion socialization was associated with their depressive symptoms at 6 months postpartum, independent of their prenatal emotion-regulation difficulties). These associations remained significant after controlling for critical covariates (e.g., child negative affect, maternal attachment). The findings provide a more nuanced understanding of the complexity inherent in the transition to parenthood and highlight potential avenues for supporting mothers' successful navigation of challenges over this transition.

The introduction of the article includes the literature review and the research hypotheses for the current study.

The transition to parenthood is a unique family life stage characterized by challenges that often contribute to changes in individual and relational domains (Cowan & Cowan, 2000). Although parental adaptation to this transition has long been viewed as a multifaceted rather than monolithic construct, few studies have approached it from a multidimensional perspective, and even fewer have examined the interrelations among different adaptation domains. Among various adaptation domains, three have been showed to be particularly sensitive to

changes across the transition to parenthood: emotion regulation (Rutherford, Wallace, Laurent, & Mayes, 2015), depressive symptoms (Nelson, Kushlev, & Lyubomirsky, 2014), and couple-relationship satisfaction (Doss & Rhoades, 2017). Moreover, there is an ongoing debate on the temporal dynamics (i.e., directionality) of the association for each pair of the three adaptation domains (Berking & Wupperman, 2012; Gross & Muñoz, 1995; Levenson, Haase, Bloch, Holley, & Seider, 2014). Without addressing these questions, the complexity in-

Sections cover the foundations of SEM, statistical underpinnings from assumptions to model modifications, steps in implementation from data preparation through writing the SEM report, and basic and advanced applications including new and emerging topics in SEM. Each chapter provides conceptually oriented descriptions, fully explicated analyses, and engaging examples that reveal modeling possibilities for use with readers' data. Many of the chapters also include access to data and syntax files at the companion website, allowing readers to try their hands at reproducing the authors' results.

**Understanding Education Research** Gary Shank, Janice Pringle, Launcelot Brown, 2015-10-23. *Understanding Education Research* is designed to help students learn to read educational research articles carefully, systematically, and critically. Students learn to categorize titles, decode abstracts, find research questions, characterize research arguments, break down methods and procedures, explore references, apply analysis strategies, and interpret findings. The book allows them to easily develop the skills they need to be research literate. It offers simple guidelines for qualitative, quantitative, and statistical approaches that help students master the basics behind these often complex and confusing methodologies. The book is accessible for future researchers or for students who simply need to understand research clearly. It is written in a clear and engaging style with ample concrete examples of each stage, offering exercises for student practice.
