The Theory and Practice of Command and Control in Environmental Policy Peter Berck, 2018-01-12 This title was first published in 2003 Economists have had increasing success in arguing the merits of market based approaches to environmental problems By making polluting expensive market based approaches provide polluters with incentives to clean up rather than mandates to stop polluting These approaches include pollution taxes transferable emissions permits and subsidies for pollution abatement The purpose of this volume is to explore the situations where Command and Control CAC may not be all bad and in fact might even have some advantages over market based instruments MBI **Ecological**

Restoration and Environmental Change Stuart K. Allison, 2012-07-26 What is a natural habitat Who can define what is natural when species and ecosystems constantly change over time with or without human intervention When a polluted river or degraded landscape is restored from its damaged state what is the appropriate outcome With climate change now threatening greater disruption to the stability of ecosystems how should restoration ecologists respond Ecological Restoration and Environmental Change addresses and challenges some of these issues which question the core values of the science and practice of restoration ecology It analyzes the paradox arising from the desire to produce ecological restorations that fit within an historical ecological context produce positive environmental benefits and also result in landscapes with social meaning Traditionally restorationists often felt that by producing restorations that matched historic ecosystems they were following nature s plans and human agency played only a small part in restoration But the author shows that in reality the process of restoration has always been defined by human choices He examines the development of restoration practice especially in North America Europe and Australia in order to describe different models of restoration with respect to balancing ecological benefit and cultural value He develops ways to balance more actively these differing areas of concern while planning restorations The book debates in detail how coming global climate change and the development of novel ecosystems will force us to ask new questions about what we mean by good ecological restoration When the environment is constantly shifting restoration to maintain biodiversity local species and ecosystem functions becomes even more challenging It is likely that in the future ecological restoration will become a never ending continuously evolving process **Ecosystem**

Digitalization in Practice

Jessamy Perriam,Katrine Meldgaard Kjær,2024-06-17 Digitalization in Practice Intersections Implications and Interventions shows that as welfare is increasingly digitalized an investigation of the social implications of this digitalization becomes increasingly pertinent The book offers chapters on how the state operates from the day to day practices of governance to keeping registers of businesses from overarching and sometimes contradictory policies to considering how to best include citizens in digitalized processes Moreover the book takes a citizen perspective on key issues of access identification and social harm to consider the social implications of digitalization in the everyday The diversity of topics in Digitalization in Practice reflects how digitalization as an ongoing process and practice fundamentally impacts and often reshapes the relationship between states and citizens

Human Behavior and the Social Environment, Macro Level Katherine van

Wormer,Fred H. Besthorn,2010-10-11 A timely revision in this global age Human Behavior and the Social Environment Macro Level develops a sophisticated and original view of the cultural global spiritual and natural worlds that people inhabit and the impact of these worlds on human behavior Its major new theme sustainability emerges as a key characteristic of contemporary practice What is sustainable social work What are the characteristics of a sustainable community How is the present exploitation of environmental resources unsustainable for future generations Following the greatest economic upheaval since the Great Depression how can we envision a sustainable economy that will benefit all the people not only the wealthy few Human behavior results from biological psychological socio economic and cultural forces but the mental health field has placed the most emphasis on intrapsychic factors to the near exclusion of socio economic and cultural considerations This significant collaboration seeks to correct this omission by helping students recognize patterns in the family culture and value systems in order to create safe and sustainable environments for their future clients The emphasis on sustainable and unsustainable social welfare programs is geared to helping readers engage in advocacy for social justice Integrates up to date research findings models and government statistics Enhanced discussions of theory group dynamics

family community and the environment Theoretical concepts and practice implications in each chapter Highlights the importance of the natural environment and ecology the community of the earth to human and group behavior Sets forth a refined understanding of the role of spirituality the community of faith in people s lives Focuses on evidence based theory and research Teaches from a global cross cultural perspective highlighting themes of empowerment and social justice Features dynamic readings personal narratives and photographs that highlight each chapter s topic Accompanied by an online instructor s manual with lecture presentations chapter summaries key terms suggested classroom activities and a test bank with essay and multiple choice questions at www.oup.com/us/HBSE Don t miss the companion volume Human Behavior and the Social Environment Micro Level Second Edition which offers an eye opening view of how biological psychological and cultural forces influence individuals behavior

Non-Target Effects of Pesticides on Organisms Inhabiting Agroecosystems Johann G. Zaller, Carsten A. Brühl, 2019-10-17 Pesticide usage is increasing worldwide and considered among the main factors contributing to the global decline in biodiversity This Research Topic provides an overview of the state of knowledge regarding non target effects of herbicides fungicides insecticides and rodenticides on a variety of ecosystem functions and organisms Taxa covered in the contributions include algae amphibians aquatic fungi aquatic insects bats bumblebees butterflies earthworms enchytraeids honeybees plants rodents and soil microorganisms The papers also highlight many gaps in our understanding of non target effects of pesticides and their consequences for biodiversity and functions of various ecosystems Overall it became clear that priorities for future work on pesticides and their effects should more focus on investigating or simulating realistic field situations i e multiple applications of pesticides during the growing season including their temporal and spatial interactions with fauna and flora
