Beinhaltet nützliche Transfusions- und Blutbankprotokolle die für die klinische Praxis relevant sind. Ausgewogene Inhalte aus Sicht von Veterinärmediziner und Veterinärtechnikern. Mit Informationen zu Groß- und Kleintieren sowie Exoten A Manual of Nuclear Medicine Procedures (Penerbit USM) Birendra K. Das, Noreen Norfaraheen Lee Abdullah, Nuclear Medicine is a fast growing specialty. The procedures provide quantitative parameters of organ functions required for modern practice of medicine. With the development of new machines and increased application of computer software the procedures are under continuous change. Some procedures have become outdated or redundant while new methods have been introduced to enhance the quality of information obtained from a particular application. Although there are a few books published abroad to inform doctors and technical staff about the procedures, a comprehensive source to give quick information about how different tests are performed, particularly the new developments and the expected outcome both in normal and abnormal cases, has been a long felt need. The physician ordering a Nuclear Medicine test also needs to know what patient preparations are required for optimal results, how to satisfy the queries of the patient particularly in respect of radiation exposure which sometimes can be a major concern of the patient. This manual has been prepared not only to describe technical details of various procedures that are currently practiced in Nuclear Medicine but also to provide quick information for the doctors and health care personnel on how to inform the patients about the investigation for which they are being referred and how to interpret the results. Since there is no such comprehensive book published yet in Asia including South East Asia it is likely to be in great demand in the region. All students of master's degree M.D., D.R.M., D.M.R.I.T., M.Sc. Nuclear Medicine and technologists already working in various diagnostic centers will likely buy this book. General practitioners and specialists who refer patients for different radio isotope investigations may find this book useful for quick reference *Separation of Phosphorus-32 from Sulfur-32* John Nicholson Butler, W. Y. Gissel, 1950 Carrier free radioactive phosphorus can be prepared in the pile by n-p process on sulfur-32. There are no by products in this material except those formed from nuclear reactions of the chemical contaminants. About 2 kg of specially purified sulfur is irradiated in a large aluminum can in the pile for a period of at least six weeks. The contents of the can are melted out and the active phosphorus is extracted with weak nitric acid under pressure at a temperature greater than 120 deg C employing mechanical

agitation The waste molten sulfur and the active phosphorus extract are separated and the latter is processed in order to remove chemical contaminants Thus carrier free active phosphorus produced in the Clinton pile is chemically separated from sulfur in multi millicurie quantities *SME Mineral Processing and Extractive Metallurgy Handbook* Courtney A. Labor and Politics in the U.S. Postal Service Vern K. Baxter,2013-06-29 Labor and Politics in the U S Postal Service grew out of concern for the way a large public organization does its work It reflects my effort to link experience working as a letter carrier and mail collector with subsequent years of study in the field of organizational sociology The final product is an academic book that certainly reveals great distance from experience in the postal workplace but I must confess that the book still presents more a view from the bottom than a view from the top of the post office I hope this view proves beneficial It turns out that studying the post office has become an ongoing project that has outlived several jobs relationships and hairlines What originated as a historical study of the 1970 reorganization became an analysis of the causes and consequences of an ongoing process of re structuring and technological change in the post office Fortunately for me similar restructurings have recently occurred in organizations and industries across the nation and around the world The competitive pressures new technologies and political and class based conflicts discussed in this book are perhaps more relevant today than they were in the late 1970s when I began research on the post office
