*Decision Modes in Complex Task Environments* Norbert Steigenberger, Thomas Lübcke, Heather Fiala, Alina Riebschläger, 2017-05-25 Despite intense research on decision making in action we still know little about when decision makers rely on deliberate vs intuitive decision making in decision situations under complexity and uncertainty Building on default interventionist dual processing theory this book studies decision making modes deliberate vs intuitive in complex task environments contingent on perceived complexity experience and decision style preference We find that relatively inexperienced decision makers respond to increases in subjective complexity with an increase in deliberation and tend to follow their decision style preference Experienced decision makers are less guided by their decision preference and respond to increases in subjective complexity only minimally This book contributes to a developing stream of research linking decision making with intra personal and environmental properties and fosters our understanding of the conditions under which decision makers rely on intuitive vs deliberate decision modes In doing so we go one step further towards a comprehensive theory of decision making in action

been and is being developed In a reader friendly way it seeks to show what has worked and what has not and to uncover the recurring patterns in maritime and naval development which explain past present and future success and failure It reflects on the historical experience of all navies but in particular it poses the question of whether China is following the same pattern of naval development illustrated by Britain at the start of the 18th century which led to two centuries of naval dominance This book will be of much interest to students of maritime power naval studies and strategic studies as well as to naval professionals around the world *International Law for Seagoing Officers, 6th Edition* Craig H Allen,2014-05-15 For those who operate on under and over the sea international law can sometimes be as complex as it is important Written by the same former seagoing officer and maritime law professional who authored the current edition of Farwell s Rules of the Nautical Road this book was designed to bring clarity and context to international law for the seagoing professional Following an introduction to public international law and a short history of the law of the sea the book describes the rules that apply in ports and in the adjacent maritime zones including the territorial sea exclusive economic zone archipelagic waters and the high seas A highlight of the book are the chapters that focus on the subjects of greatest interest to the seagoing professional including military and intelligence activities in the maritime domain maritime law enforcement activities and the use of force at sea The appendices include the text of the 1982 UN Convention on the Law of the Sea Whether an academy cadet a midshipman a seasoned commanding officer or a master mariner readers of this thorough and timely book will be rewarded with a far greater understanding of the international laws that govern ships and mariners at sea
