Responses to Sea Migration and the Rule of Law Katia Bianchini,2024-08-22 In the current debates on sea migration there is a dearth of works drawing on the rule of law This important book addresses this failing Considering the question from that conceptual framework it is able to broaden the sometimes fragmented and incomplete perspective of existing scholarship The book takes as its central case study the experience of Italy exploring the legal issues at play there and its institutional practices and policies From here its focus broadens out to the wider EU experience looking in particular at those problems common to southern EU states such as failures and delays in assisting migrants in distress at sea and contested legal grounds and practices concerning interceptions at sea It combines both legal and empirical data charting both the black letter law and how it operates in practice In a field as complex as this this clarity is key it allows lawyers political scientists and policymakers to truly engage with the challenges sea migration poses today

How to Grow a Navy Geoffrey Till,2022-09-02 This book examines the large but neglected topic of the development of maritime power from both an historical and a contemporary point of view Navies have never been more important than they are now in a century becoming as widely expected increasingly and profoundly maritime The growing competition between China and Russia with the United States and its allies and partners around the world is essentially sea based The sea is also central to the world s globalised trading system and to its environmental health Most current crises are either sea based or have a critical maritime element to them What happens at sea will help shape our future Against that background this book uses both history and contemporary events to analyse how maritime power and naval strength has been and is being developed In a reader friendly way it seeks to show what has worked and what has not and to uncover the recurring patterns in maritime and naval development which explain past present and future success and failure It reflects on the historical experience of all navies but in particular it poses the question of whether China is following the same pattern of naval development illustrated by Britain at the start of the 18th century which led to two centuries of naval dominance This book will be of much interest to students of maritime power naval studies and strategic studies as well as to naval professionals around the world

Global Governance on the Ground Nele Kortendiek, 2024-11-06 Global Governance on the Ground offers a new approach to how international organizations govern Through an in depth look at the case of migration and asylum the book argues that international organizations IOs not only govern global challenges through rules standards expertise and numbers but also through practice on the ground Much scholarship has been devoted to the question of how IOs become autonomous agents and exercise authority to shape governance outcomes Far less attention has been given to the way IOs use their field access to govern global issues on the ground without first going through formal policy channels or renegotiating their authority The book demonstrates that through field based practice IOs directly regulate global issues in the spaces where they become virulent in different locations across the globe The book draws on ethnographic fieldwork at the European external border comprising interviews at the headquarters of seven organizations including the United Nations High Commissioner for Refugees UNHCR the International Organization for Migration IOM and three humanitarian NGOs This combined with an extensive document analysis shows that field staff improvise to organize collective action on under regulated issues and that headquarter staff consolidate and diffuse their operational knowledge The book conceptualizes this governance mode that operates at a low institutional threshold but largely determines the de facto governance of contested or crisis ridden global problems
