The book also raises critical questions regarding the status of the African air transport market. Firstly, with the introduction of an open skies policy in Africa, will the national flag carriers be able to compete under the new market dynamics? Will the SAATM become a game changer in paving the way for the privatisation of some of Africa's poor performing airlines? Will the SAATM create a competitive market and a shift in airfares? How will policymakers deal with the excessive aviation taxes, fees, and charges that make airfares in Africa the highest in the world? What will the economic benefits be for signatory states that embrace the SAATM? Will there be a significant growth trajectory in terms of air travel demand? This book is intended for researchers studying air transport economics in developing markets, graduate students with a primary focus on air transport development, senior policymakers and professionals at governmental agencies and industry practitioners who want to expand their understanding of the dynamics shaping Africa's air transport landscape.
