

1.4 Microeconomics - Market failure

Market failure

→ Analyse the concept of market failure as a failure of the market to achieve allocative efficiency, resulting in an over-allocation of resources (over-provision of a good) or an under-allocation of resources (under-provision of a good):

- **Market failure:** failure of the market to achieve allocative efficiency ($MSC = MSB$), resulting in an over-allocation of resources (over-provision of a good) or an under-allocation of resources (under-provision of a good).
- **Allocative efficiency:** occurs when scarce resources are allocated in such way to maximize consumer satisfaction; point where the social surplus is maximized with no deadweight loss.

→ Describe the concepts of marginal private benefits (MPB), marginal social benefits (MSB), marginal private costs (MPC) and marginal social costs (MSC):

- **Marginal private benefits (MPB):** benefit enjoyed by consumers in consuming a good or service.
- **Marginal social benefits (MSB):** MPB plus or minus the additional benefit or cost to the society with consumption.
- **Marginal private costs (MPC):** total cost brought about by producers in producing a good or service.
- **Marginal social costs (MSC):** MPC plus or minus the additional benefits or the cost to the society with production.

→ Describe the meaning of externalities as the failure of the market to achieve a social optimum where $MSB = MSC$:

- **Externalities:** costs or benefits of production or consumption that are experienced by third parties (the society, but not the producers and consumers that cause them, resulting in the failure of the market to achieve social optimum of $MSB = MSC$).

Negative externalities of production and consumption

→ Explain, using diagrams and examples, the concepts of negative externalities of production and consumption, and the welfare loss associated with the production or consumption of a good or service.

- **Negative externalities of production:** situation where the society pays an overall higher cost than what the firms produce.
 - **Extent of externalities:** society pays a higher cost than firms ($MSC > MPC$) by extent of externalities.
 - **Social optimum:** there is an **over-provision** in society ($Q1 > Q2^*$) resulting in welfare loss.
 - These are mainly environmental problems (e.g., waste pollution in a factory manufacturing bag production).
- **Negative externalities of consumption:** situation where the consumer gains a greater benefit than the overall society.
 - **Extent of externalities:** society receives less benefit than consumers ($MPB > MSB$) by extent of externalities.
 - **Social optimum:** there is an **over-consumption** in society ($Q2 > Q1^*$) resulting in welfare loss.
 - These are mainly environmental/health problem (e.g., third party risk associated with smoking).

→ Explain that demerit goods are goods whose consumption creates external costs.

- **Demerit goods:** goods whose consumption creates external costs (e.g., cigarettes, alcohol).

→ Evaluate, using diagrams, the use of policy responses, including market-based policies (taxation and tradable permits), and government regulations, to the problems of negative externalities of production and consumption.

- **Tradable permits:**
 - Action: limiting of negative activities of firm shifts the MPC closer to MSC as firms will have incentive to be environmentally efficient (e.g., carbon emissions permits, fishing quotas).
 - Result: extent of externality is reduced, reduced difference between $Q1$ and Q^* and reduced welfare loss.
 - Benefits: address market failure.

Ib Economics SI Paper 23:

Introduction to Intercultural Economics Rongxing Guo, 2012-04-23 This book presents a methodological framework for the analysis of intercultural issues frequently misinterpreted by existing theories It uses a challenge and response theory of cultural development to examine the relationship between different natural disasters and threats and the developments of ancient civilizations The spatial interaction of ancient civilizations is assessed and four non linear patterns of intercultural dynamics are presented Our empirical analyses of the four major ancient civilizations the Mesopotamian the Egyptian the Indus and the Chinese focus on intercultural influences as well as how they have shaped the spatial dynamics of the world as a whole This book also examines various aspects of intercultural economic influences such as those of culture on international trade Evidence from a broad panel of nations supports the presumption that high income trade partners will be less sensitive to the measures of cultural dissimilarity than low income trade partners between which cultural dissimilarity leads to barriers to international trade The treatment of linguistic and religious factors as continuous variables in this book has improved past studies in which language was treated as one or more dummy variables and religion was ignored

Intercultural Economic Analysis Rongxing Guo, 2009-08-29 Since the end of the Cold War the study of intercultural relations has become one of the most popular topics in the field of global politics and economics This book presents a methodological framework for the analysis of intercultural issues frequently misinterpreted by existing theories The book uses a challenge and response theory of cultural development to examine the relationship between different natural disasters and threats and the developments of ancient civilizations The spatial interaction of ancient civilizations is assessed and some theoretical patterns of intercultural influences are presented with a focus on the Chinese Egyptian Indus and Mesopotamian civilizations Using the development of China as a case study and on the basis of a simplified spatial model the optimal spatial structure and size of culture areas are mathematically solved and the political economy implications to the interactions between cultures differing in size are illustrated The book also examines various aspects of intercultural economic influences such as those of culture on international trade The empirical results suggest that high income trade partners are less sensitive than low income trade partners to the measures of cultural dissimilarity which block international trade The existing literature relating to the determinants of economic growth treats explanatory variables such as income inequality and cultural diversity separately This book investigates whether there are any conditions under which income inequality and cultural diversity could encourage economic growth and provides evidence from a broad panel of nations which reveals that economic growth is quite independent from the variables of inequality and cultural linguistic and religious diversity Finally this book provides suggestions for how cultural influences can benefit developing economies both large and small

Understanding Mineral Deposits Kula Misra,2012-12-06 Mineral deposits have supplied useful or valuable material for human consumption long before they became objects of scientific curiosity or commercial exploitation In fact the earliest human interest in rocks was probably because of the easily accessible useful e g red pigment in the form of earthy hematite or valuable e g native gold and gemstones materials they contained at places In modern times the study of mineral deposits has evolved into an applied science employing detailed field observations sophisticated laboratory techniques for additional information and computer modeling to build complex hypotheses Understanding concepts that would someday help geologists to find new mineral deposits or exploit the known ones more efficiently have always been and will continue to be at the core of any course on mineral deposits but it is a fascinating subject in its own right even for students who do not intend to be professional economic geologists I believe that a course on mineral deposits should be designed as a capstone course that illustrates a comprehensive application of concepts from many other disciplines in geology mineralogy stratigraphy and sedimentation structure and tectonics petrology geochemistry paleontology geomorphology etc This book is intended as a text for such an introductory course in economic geology primarily for senior undergraduate and graduate students in colleges and universities It should also serve as a useful information resource for professional economic geologists

Introduction This volume is dedicated to the remarkable career of Professor Peter Schmidt and the role he has played in
mentoring us his PhD students Peter s accomplishments are legendary among his students and the profession Each of the
papers in this Festschrift is a research work executed by a former PhD student of Peter s from his days at the University of
North Carolina at Chapel Hill to his time at Michigan State University Most of the papers were presented at The Conference
in Honor of Peter Schmidt June 30 July 2 2011 The conference was largely attended by his former students and one current
student who traveled from as far as Europe and Asia to honor Peter This was a conference to celebrate Peter s contribution
to our contributions By our contributions we mean the research papers that make up this Festschrift and the countless other
publications by his students represented and not represented in this volume Peter s students may have their families to thank
for much that is positive in their lives However if we think about it our professional lives would not be the same without the
lessons and the approaches to decision making that we learned from Peter We spent our days together at Peter s conference
and the months since reminded of these aspects of our personalities and life goals that were enhanced fostered and nurtured
by the very singular experiences we have had as Peter s students We recognized in 2011 that it was unlikely we would all be
together again to celebrate such a wonderful moment in ours and Peter s lives and pledged then to take full advantage of it
We did then and we are now in the form of this volume *Reader's Guide to Periodical Literature Supplement* ,1919 These

people of Timor Leste independence promised a fundamental transformation from foreign occupation to self rule from brutality to respect for basic rights and from poverty to prosperity In the eyes of the country s political leaders revenue from the country s oil and gas reserves is the means by which that transformation could be effected Over the past decade they have formulated ambitious plans for state led development projects and rapid economic growth Paradoxically these modernist visions are simultaneously informed by and contradict ideas stemming from custom religion accountability and responsibility to future generations This book explores how the promise of prosperity informs policy and how policy debates shape expectations about the future in one of the world s newest and poorest nation states *Parliamentary Papers* Great Britain.
