10 MARK QUESTION (Part a)

Step 1: Definition: Define a key word in the question

Step 2: Definition: Define another key word in the question (if there is another one)

Step 3: Definition: Define another key word in the question (if there is another one)

Step 4: Real life example: Briefly explain a real life example.

Step 5: Draw the diagram: Draw it accurately and fully labelled and with a title on top (clearly stating what it is showing, if appropriate the market, and where). Where possible, apply your example: e.g. Quantity of Oil (barrels), Price of Oil (\$).

Step 6 (i) Tell us what the diagram shows, in general. **Explain** a specific insight of **the diagram** (i.e. "As the diagram shows, the warmer weather results in a greater demand for ice cream. At Price P1, the quantity demanded increases from Q1 to Q2.")

Step 6 (ii) Tell using specific reference points on the diagram, subsequent effects, changes or knock-on effects (i.e. The rightward shift of the demand curve from D1 to D2, puts upward pressure on the price P1. This acts as a signal to producers that they can raise their price due to excess demand leading to a new price of P2).

The diagram must be **dynamic** (e.g. something has shifted, increased, decreased), use arrows for emphasis.

DO NOT ABBREVIATE ANY TERMS IN YOUR WRITTEN WORK UNTIL YOU HAVE WRITTEN THEM OUT IN FULL AT LEAST ONCE! Assume no prior knowledge of the person reading (i.e. that means they don't know what AS, PeD or GDP stand for).

15 MARK QUESTION (Part b)

Step 1: Carry out all the above steps as you would for a 10 mark question.

Do not repeat diagrams. If the diagram you need is in part (a) then refer to the diagram and the points on it in part (a).

intercultural relations has become one of the most popular topics in the field of global politics and economics This book presents a methodological framework for the analysis of intercultural issues frequently misinterpreted by existing theories The book uses a challenge and response theory of cultural development to examine the relationship between different natural disasters and threats and the developments of ancient civilizations The spatial interaction of ancient civilizations is assessed and some theoretical patterns of intercultural influences are presented with a focus on the Chinese Egyptian Indus and Mesopotamian civilizations Using the development of China as a case study and on the basis of a simplified spatial model the optimal spatial structure and size of culture areas are mathematically solved and the political economy implications to the interactions between cultures differing in size are illustrated The book also examines various aspects of intercultural economic influences such as those of culture on international trade The empirical results suggest that high income trade partners are less sensitive than low income trade partners to the measures of cultural dissimilarity which block international trade The existing literature relating to the determinants of economic growth treats explanatory variables such as income inequality and cultural diversity separately This book investigates whether there are any conditions under which income inequality and cultural diversity could encourage economic growth and provides evidence from a broad panel of nations which reveals that economic growth is quite independent from the variables of inequality and cultural linguistic and religious diversity Finally this book provides suggestions for how cultural influences can benefit developing economies both large and small
