

SAMPLE 1 : INQUIRY ESSAY

Nuclear power is just one of many forms of alternative energy we are looking at today. In many ways it seems like a good answer; there has only been one nuclear emergency in the United States to date, nuclear power reactors produce no greenhouse gasses, and one fuel pellet (I'll explain these a little later) can generate the same amount of energy as 149 gallons of oil, or 1,780 lbs. of coal (Hansen). On the other hand, nuclear power does produce radiation and nuclear waste. Another huge threat of nuclear power is the possibility of a nuclear meltdown. So, how great are the dangers of nuclear energy, and how great are the benefits? What are the positive and negative effects of the further development of this technology?

Before I examined nuclear energy my views on nuclear energy were mostly positive. Firstly, global warming is a big threat; not just to Americans or humans, but to almost every living organism on the planet. It is our job to do whatever we can to stop the damage we are doing to our planet, and to begin to reverse it. Nuclear power is a good way to lessen our dependency on fossil fuels, and to lower our CO2 output. Secondly, countries like France and Belgium are proving that nuclear energy can work on a large scale; they already get more than 50% of their energy from nuclear power. Finally, although a nuclear meltdown is the terrifying crisis that can come from nuclear power, in the entire history of nuclear power there has only been one nuclear meltdown; the nuclear power plant in Chernobyl, Russia experienced a meltdown in 1986. No new nuclear power plants have been built in America since the meltdown, despite the fact that the technology in our plants has gotten safer and more efficient.

Three of my sources stood out as being the most informative, all three of them were from the *CQ Researcher*. "Energy and the Environment", by Mary H. Cooper gave a lot of specific information on how global warming has affected the nuclear power industry. "Nuclear Waste", by Brian Hansen looked into how the waste is being stored, the radiation created by this waste and how it affects us, and Yucca Mountain, the possible future sight of the federal nuclear waste reserve. "Nuclear Energy" by Jennifer Weeks was the best source, it gave information about the entire nuclear process, viewpoints from both sides of the issue, and it was the most recent report I found on the subject.

Churchman Allan K. Davidson, 2011 New Zealand's first Anglican bishop George Selwyn was a towering figure in the young colony. Denounced as a turbulent priest for speaking out against Crown practices that dispossessed Maori, he brought a vigorous approach to episcopal leadership. His wife Sarah Selwyn supported all her husband's activities in a life characterised as one of hardship and anxiety; she expressed independently her sense of outrage over the Waitara dispute. Selwyn promoted participatory church government, founded the innovative Melanesian Mission, and developed a distinctive style of colonial church architecture. More controversially, he battled with the Church Missionary Society and was caught up in the bitter maelstrom of settler and Maori politics. His personal links with colonial and ecclesiastical networks gave him access to the heart of empire. These essays offer new insights into Selwyn's role in developing pan-Anglicanism, strengthening links between the Church of England and the Episcopal and Anglican Churches in North America, and his time as Bishop of Lichfield, 1868-78. His place in Treaty history as a political commentator and source of historical information is recognised. George Selwyn left a large imprint on New Zealand church and society. This collection both honours and critiques a controversial bishop. **Official Report of Debates, House of Commons** Canada. Parliament. House of Commons, 1900

Scaling-up Higher Order Thinking Anat Zohar, 2023-05-30 This open access book addresses the evasive problem of why truly effective educational innovation on a wide scale is so difficult to achieve and what leaders may do about this. Examining the case of system-wide reform processes centering on teaching a thinking-rich curriculum, it discusses general issues pertaining to implementing deep, large-scale changes in the core of learning and instruction. The book emphasizes challenges related to professional development, assessment, achievement gaps, and the tension between knowledge and skills in 21st-century curricula. It summarizes insights the author has gained from approximately 25 years of engaging with these topics both as an academic and as a practitioner who led a national change process. With a Forward by David Perkins.
