

## 1. THE FOLLOWING SHOULD ALWAYS BE OBSERVED FOR SAFETY

- Be sure to read THE FOLLOWING SHOULD ALWAYS BE OBSERVED FOR SAFETY before installing the air conditioner.
  - Be sure to observe the cautions specified herein as they include important items related to safety.
  - The cautions and messages are as follows.
- DANGER:** Could lead to death, serious injury etc.
- CAUTION:** Could lead to minor injury in particular small amounts when operated incorrectly.
- After reading this manual, be sure to keep it together with the OPERATING INSTRUCTIONS in a handy place on the customer's site.

### WARNING

- Do not install the unit by yourself yourself. Incorrect installation could cause injury due to the start-up shock, the disconnecting or damage of power. Consult the dealer when you purchase the unit or special installer.
- Install the unit securely in a place which can bear the weight of the unit. When installed in an insufficient strength place, the unit could fall causing injury.
- Use the specified tools to connect the indoor and outdoor units securely and attach the wires firmly to the terminal block connecting screws so the stress of the wires is not applied to the terminals. Incorrect connecting will bring about noise.
- Do not use unnecessary connection of the power cord or the extension cord and do not connect many devices to one AC outlet. It may cause a fire or an electric shock due to excessive contact resistance, insulation, causing the permanent current, etc.
- Check that the refrigerant gas does not leak after installation has completed. Refrigerant gas is very volatile, and causes the explosion of fire or even human fatalities. Do not touch refrigerant gas as it is extremely dangerous.
- Protect the insulation securely reflecting on the insulation sleeves. Incorrect insulation could cause a personal injury due to the electric shock, the shorting of voltage or water.
- Perform air piping. Do not connect the unit pipe to a gas pipe, water pipe, lighting rod, or telephone with wire. Collision with such causes an electric shock.
- Do not install the unit in a place where an inflammable gas leak. If you suspect a leak in the area surrounding the unit, it could cause an explosion.
- Place a base mat with a large enough area specified in this manual. When balanced too light, a horizontal may become after a long period and cause a damage of equipment.
- Perform electrical work according to the installation diagram and be sure to use an earthing connection. If the capacity of the power source is insufficient or there is insufficient electrical work, it could result in a fire or an electric shock.
- Attach the electrical cover to the indoor unit and the service panel for the indoor unit securely. If it is disconnected from the indoor unit and the service panel in the outdoor unit and attached securely, it could result in a fire or an electric shock due to short circuit, etc.
- Do not use the non-specified or specified parts for the installation work. The use of inferior parts could cause an injury due to a fire or an electric shock, the unit failing, leakage of refrigerant, etc.
- Do not turn off the main power in case of pulling up the indoor electronic control PCB during the wiring work. A power source is always used.
- The refrigerant shall be handled in accordance with national piping regulations.
- When installing or relocating the unit, make sure that no substance other than the specified refrigerant enters the refrigeration system. Any presence of foreign substance such as oil can cause abnormal pressure rise or an explosion.

### CAUTION

- Perform air piping. Do not connect the unit pipe to a gas pipe, water pipe, lighting rod, or telephone with wire. Collision with such causes an electric shock.
- Do not install the unit in a place where an inflammable gas leak. If you suspect a leak in the area surrounding the unit, it could cause an explosion.
- Place a base mat with a large enough area specified in this manual. When balanced too light, a horizontal may become after a long period and cause a damage of equipment.
- Check an earth leakage breaker (insulating) on the installation point (where it is located). If the earth leakage breaker is disconnected, it may cause an electric shock.
- Perform the discharging work securely according to the installation manual. If there is a leak in the connection tube and water could drip from the unit, insulation protection must be set and damaged.

## 2. INSTALLATION DIAGRAM & ACCESSORIES

### Before Installation

This installation manual is only for the outdoor unit installation. In installing the indoor units, refer to the installation manual attached to each indoor unit.  
Any structural alterations necessary for the installation must comply with the local building code regulations.

**Building/Object** Charlotte Ashby,Mark Crinson,2022-06-16 Building Object addresses the space in between the conventional objects of design and the conventional objects of architecture probing and reassessing the differences between the disciplines of design history and architectural history Each of the 13 chapters in this book examine things which are neither object like nor building like but somewhere in between air conditioning bookshelves partition walls table monuments TVs convenience stores cars exposing particular political configurations and resonances that otherwise might be occluded In doing so they reveal that the definitions we make of objects in opposition to buildings and of architecture in opposition to design are not as fundamental as they seem This book brings new aspects of the creative and experiential into our understanding of the human environment
