

1 Setting the codes on the wall control and receiver

NOTE: The frequencies on your receiver and hand unit have been preset at the factory. Before installing the receiver, make sure the dip switches on the receiver and wall control are set to the same frequency. The dip switches on the wall control are located inside the battery compartment.

NOTE: The battery will weaken with age and should be replaced before leaking takes place as this will damage the hand unit. Dispose of the used battery properly and keep the battery out of the reach of children.

NOTE: It is imperative that the code used for both transmitter and receiver is exactly the same, otherwise remote controller will not work.

Setting the Code on the Wall Controller

- Insert a small flat screwdriver into one of the slots in the bottom of the battery cover on the front of the wall control (A) and gently pry the cover off.
- Slide the code switches to your choice of either up or down. The factory setting is up.
- For fans with dimmable bulbs, slide the dip switch O/D to the position marked "D", if you are not using dimmable bulbs slide the dip switch to the "O" position.
- Install 1 - A23 battery (12V) (included).
- Replace the battery cover on the wall control (A).

Setting the Code on the Receiver

- Slide the code switches on the receiver (B) to the same positions as set on the remote control (A).
- Insert the silicone rubber plug (E) into the hole in the receiver (B) to cover the dip switches.
