HWM, 2007-04 Singapore's leading tech magazine gives its readers the power to decide with its informative articles and in depth reviews *Voice & Data*, 2007 **Communications and Multimedia Security** Bart De Decker, Ingrid Schaumüller-Bichl, 2010-05-29 Over the last decade we have witnessed a growing dependency on information technology resulting in a wide range of new opportunities. Clearly it has become almost impossible to imagine life without a personal computer or laptop or without a cell phone. Social network sites SNS are competing with face face encounters and may even oust them. Most SNS adepts have hundreds of friends happily sharing pictures and pro les and endless chitchat. We are on the threshold of the Internet of Things where every object will have its RFID tag. This will not only effect companies who will be able to optimize their production and delivery processes but also end users who will be able to enjoy many new applications ranging from smart shopping and smart fridges to geo localized services. In the near future elderly people will be able to stay longer at home due to clever health monitoring systems. The sky seems to be the limit. However we have also seen the other side of the coin: viruses, Trojan horses, breaches of privacy, identity theft and other security threats. Our real and virtual worlds are becoming increasingly vulnerable to attack. In order to encourage security research by both academia and industry and to stimulate the dissemination of results, conferences need to be organized. With the 11th edition of the joint IFIP TC 6 TC 11 Conference on Communications and Multimedia Security CMS 2010 the organizers resumed the tradition of previous CMS conferences after a three year recess **Vibe**, 2007 **Info examine**, 2008-07 *Veja*, 2007 **HVG.**, 2007 *Wprost*, 2007 **Globus**, 2007 *Polityka*, 2008 *Digital Forensics and Cyber Crime* Sanjay Goel, 2010-01-13 The First International Conference on Digital Forensics and Cyber Crime ICDF2C was held in Albany from September 30 to October 2, 2009. The field of digital forensics is growing rapidly with implications for several fields including law enforcement, network security, disaster recovery and accounting. This is a multidisciplinary area that requires expertise in several areas including law, computer science, finance, networking, data mining and criminal justice. This conference brought together practitioners and researchers from diverse fields providing opportunities for business and intellectual engagement among attendees. All the conference sessions were very well attended with vigorous discussions and strong audience interest. The conference featured an excellent program comprising high quality paper presentations and invited speakers from all around the world. The first day featured a plenary session including George Philip, President of University at Albany, Harry Corbit, Superintendent of New York State Police and William Pelgrin, Director of New York State Office of Cyber Security and Critical Infrastructure Coordination. An outstanding keynote was provided by Miklos Vasarhelyi on continuous auditing. This was followed by two parallel sessions on accounting fraud, financial crime and multimedia and handheld forensics. The second day of the conference featured a mesmerizing keynote talk by Nitesh Dhanjani from Ernst and Young that focused on psychological profiling based on open source intelligence from social network analysis. The third day of the conference featured both basic

and advanced tutorials on open source forensics *Samsung Galaxy A05 and A05S User Manual For Beginners and Seniors*
