Lesson 6 - How were the pyramids built?

Where were the dead kept?

The largest pyramid ever built was the Great Pyramid of Giza, which was built for Pharaoh Khufu during the Old Kingdom.

It was the tallest structure in the world for more than 3,800 years until Lincoln Cathedral was built in England in 1311 AD.

Inside the Pyramid

Inside the pyramid, the pharaoh's mummified body would be put in a special coffin in the King's chamber. The wife's body would be put into the Queen's chamber. The great gallery is a long passageway with steps leading to the chambers and the ventilation shafts are used to let air into the pyramid while it was being built.
