

ADVANCED CONTROLS

ENERGY ALLOCATION

There are three primary systems on the ship: Shields, Weapons, and Engines. At any time, you can boost the performance of one area by reducing the performance of another. Press and hold the **Shift** key to bring up the Energy Allocation Panel. Use the **W**, **S**, **A**, and **D** keys to reallocate energy to the different systems.

The three systems that you may allocate energy to are:

Engines

Adjusting the amount of energy supplied to a ship's engines varies its top impulse speed from a minimum value to a maximum value. Increasing energy to a ship's engines also improves its turning ability.

Weapons

Adjusting the amount of energy supplied to a ship's weapons varies the recharge rate of its weapons ports and increases phaser range.

Shields

Adjusting the amount of energy supplied to a ship's shields varies the recharge rate of its shield generators.

ENGINEERING SCREEN

The Engineering Screen allows you to prioritize the field repairs on your ship. Left alone, your repair crews will repair all systems equally. However you can also choose to focus repairs on one system at the expense of repairing the others. The **R** key will bring up the repair panel (as well as the **Forward** button on the mouse).

Use the mouse to highlight the subsystem that you want to repair. To select a different ship to repair, use **1**, **2**, **3**, or **4** keys to select that ship.

FLEET CONTROL

Star Trek: Legacy allows you to command up to four ships at once. Use the **1**, **2**, **3**, or **4** keys to switch between the ships in your fleet.

By default, all of the ships in your fleet are grouped together. At any time, you can separate a ship from the group and give orders independent of the other ships.

To select all ships:

Press the **5** key.

To select one ship:

Press the **1**, **2**, **3**, or **4** keys.

Group Orders

Spacebar + S key - Change current target to closest target of focus ship

Spacebar + A key - Target nearest attacker

Spacebar + D key - Clear target

Spacebar + W key - Time at Warp

COMMAND VIEW

Press the **Tab** key to bring up the Command View. This view shows a strategic map showing all known objects within your scanner range.

You can quickly issue orders to ships in Command View. Select a ship or ships with the **1**, **2**, **3**, or **4** keys.

Press the **Back** button on the mouse or the **G** key to order them to move/attack, or press the **Middle Mouse** button or **Q** key to have them warp to a given location.
