

Format	Advantages	Disadvantages
Digital 	• Your phone is always with you – no need to carry anything extra • You can delete, edit, and move information more quickly • Synching is automatic. If you lose your device you won't lose your information.	• It takes more time to jot a note, often resulting in more tasks staying in your memory • There are so many options you can fall prey to the tyranny of choice – always jumping from app to app and never fully committing to one tool • Technology can be a pain in the you-know-what, wasting your time 'fixing glitches'.
Paper 	• It is super fast to jot down notes, a reminder, or a to-do • Actually writing something down can help you remember and process the information • There is no learning curve or manual that comes with a paper management system – we inherently know how to use it	• You have to carry your calendar and lists with you at all times • Editing and deleting information can make for a messy page • Paper can be easy to lose and keep track of and doesn't come with a built-in back-up system
