Principles and Practice of Constraint Programming - CP98 Michael Maher, Jean-Francois Puget, 2003-05-20

Constraints have emerged as the basis of a representational and computational paradigm that draws from many disciplines

and can be brought to bear on many problem domains This volume contains papers dealing with all aspects of computing with

constraints In particular there are several papers on applications of constraints reflecting the practical usefulness of

constraint programming The papers were presented at the 1998 International Conference on Principles and Practice of

Constraint Programming CP 98 held in Pisa Italy 26 30 tober 1998 It is the fourth in this series of conferences following

conferences in Cassis France Cambridge USA and Schloss Hagenberg Austria We received 115 high quality submissions In

addition 7 abstracts submissions were not followed by a full paper hence were not counted as submissions The program

committee selected 29 high quality papers after thorough refereeing by at least 3 experts and further discussion by

committee members We thank the referees and the program committee for the time and effort spent in reviewing the papers

The program committee invited three speakers Joxan Jaffar Peter Jeavons Patrick Prosser Their papers are in this volume
