

McKinsey Problem Solving Test

Practice Test Overview and Instructions

This practice test is designed to offer a sample of the actual McKinsey Problem Solving Test used for candidate selection. The test evaluates your ability to solve business problems using deductive, inductive, and quantitative reasoning. It consists of 26 questions, mirroring the format of the real test, where you will have 60 minutes to answer as many questions as possible.

Each section of the test presents three scenarios based on real McKinsey client cases. Information relevant to each scenario is presented in various formats, such as text, tables, and exhibits, often highlighted in shaded areas. The questions require you to select the most appropriate answer based solely on the provided information. You should choose one and only one answer for each question.

During this practice test, electronic devices like calculators or computers should not be used for calculations. In the actual test, such devices are also not allowed. However, you can use any blank space in the test booklet as scratch paper for calculations and note-taking. These booklets will be destroyed after the test, and they will not affect your final score, which is determined solely by the number of correctly answered questions.

To score your performance, refer to the answer key at the end of this booklet. Your final score is determined by the number of correct answers you provide.

Innovation Capital

The Group of Eight (G8) consists of political representatives from eight of the world's largest eleven economies, namely the United States, United Kingdom, Canada, Germany, France, Italy, Japan, and Russia. Periodically, the G8 convenes to discuss important issues affecting its member states and collaborates on measures to address these concerns.

One pressing topic for the upcoming meeting of G8 Finance Ministers is the slow economic growth experienced by these countries in recent years. To prepare for this meeting, a team from McKinsey, in collaboration with external thought leaders and academics, is in the process of crafting a report on the significance of Innovation as a driver of economic growth. The team aims to introduce the concept of "Innovation Capital" to G8 representatives, which refers to the
